## **Executive Summary**

Cumberland County is pleased to present its 2019 Community Health Needs Assessment. This report provides an overview of the methods and process used to identify and prioritize significant health needs in Cumberland County.

#### **Service Area**

The service area for this report is defined as the geographical boundary of Cumberland County, North Carolina. Cumberland County is located in the center part of the state and has an area of 658 square miles, of which 652 is land and 6.1 square miles is water.

## **Methods for Identifying Community Health Needs**

#### **Secondary Data**

Secondary data used for this assessment were collected and analyzed from Conduent HCl's community indicator database. The database, maintained by researchers and analysts at Conduent HCl, includes over 100 community indicators from various state and national data sources such as the North Carolina Department of Health and Human Services, the Centers for Disease Control and Prevention and the American Community Survey. See Appendix B for a full list of data sources used.

Indicator values for Cumberland County were compared to North Carolina counties and U.S. counties to identify relative need. Other considerations in weighing relative areas of need included comparisons to North Carolina state values, comparisons to national values, trends over time, Healthy People 2020 targets and Healthy North Carolina 2020 targets. Based on these seven different comparisons, indicators were systematically ranked from high to low need. For a detailed methodology of the analytic methods used to rank secondary data indicators see Appendix B.

#### **Primary Data**

The primary data used in this assessment consisted of (1) a community survey distributed through online and paper submissions and (6) focus group discussions. Over 1300 Cumberland County residents contributed their input on the community's health and health-related needs, barriers, and opportunities, with special focus on the needs of vulnerable and underserved populations.

See Appendix C for all primary data collection tools used in this assessment.

## **Summary of Findings**

The CHNA findings are drawn from an analysis of an extensive set of secondary data (over 100 indicators from national and state data sources) and in-depth primary data from community leaders, health and non-health professionals who serve the community at large, vulnerable populations, and populations with unmet health needs. Through a synthesis of the primary and secondary data the significant health needs were determined for Cumberland County and are displayed in Table 1.

**Table 1. Significant Health Needs** 

Access to Health Services
Economy
Exercise, Nutrition & Weight
Immunizations & Infectious Diseases
Occupational & Environmental Health
Other Chronic Diseases
Public Safety
Respiratory Diseases
Substance Abuse

## **Selected Priority Areas**

After receiving the completed Community Health Needs Assessment from Conduent HCI, a Cumberland County Community Coalition was organized to determine CHNA priority area. The Community Coalition invitees included community leaders, public health agencies, businesses, hospitals, private practitioners, behavioral health providers, and academic centers. After examining the results of the CHNA survey (primary data) and secondary health data, the Community Coalition selected five health priorities for the 2019 CHNA process: Access to Health Services; Economy (employment, housing, food security, and living below poverty); Exercise, weight, and nutrition; Public Safety, and Substance Abuse.

#### **Conclusion**

This report describes the process and findings of a comprehensive health needs assessment for the residents of Cumberland County, North Carolina. The prioritization of the identified significant health needs will guide community health improvement efforts of Cumberland County. Following this process, Cumberland County will outline how they plan to address the prioritized health needs in their implementation plan.

## Introduction

Cumberland County is pleased to present the 2019 Community Health Needs Assessment, which provides an overview of the significant community health needs identified in Cumberland County, North Carolina.

The goal of this report is to offer a meaningful understanding of the most pressing health needs across Cumberland County, as well as to guide planning efforts to address those needs. Special attention has been given to the needs of vulnerable populations, unmet health needs or gaps in services, and input gathered from the community.

Findings from this report will be used to identify, develop and target initiatives to provide and connect community members with resources to improve the health challenges in their communities.

The 2019 Cumberland County Community Health Needs Assessment was developed through a partnership between the Cumberland County Department of Public Health, Cape Fear Valley Health, Health ENC and Conduent Healthy Communities Institute, with Cape Fear Valley Health System serving as the fiscal sponsor.

#### **About Health ENC**

Initiated in 2015 by the Office of Health Access at the Brody School of Medicine at East Carolina University, Health ENC grew out of conversations with health care leaders about improving the community health needs assessment (CHNA) process in eastern North Carolina. Health ENC, now a program of the Foundation for Health Leadership and Innovation (FHLI), coordinates a regional CHNA in 33 counties of eastern North Carolina. In addition, the Health ENC Program Manager works to build coalitions and partnerships that will address health issues identified through the regional CHNA process.

As part of the Affordable Care Act, not for profit and government hospitals are required to conduct CHNAs every three years. Similarly, local health departments in North Carolina are required by the Division of Public Health (DPH) in the NC Department of Health and Human Services (DHHS) to conduct periodic community health assessments as well. Local health departments have been required to submit their community health needs assessments once every four years. The particular year CHNA submissions are made by hospitals within a three-year cycle or by local health departments within a four-year cycle is not uniform across the state or region.

Additionally, although local health departments and hospitals have guidance from their respective oversight authorities on how to conduct and report the results of their CHNAs, that guidance allows for wide variations in the execution of these reports. The methodologies, specific data items gathered, the interpretation of the data as well as the general approach and scope of one CHNA may have little resemblance to a CHNA in another jurisdiction or conducted by another organization.

For these reasons, health care leaders across eastern North Carolina have partnered to standardize the CHNA process for health departments and hospitals in the region. This effort will also sync all participant organizations on to the same assessment cycle. Combining efforts of local health departments and hospitals in a regional CHNA will ultimately lead to an improvement in the quality and utility of population health data, the ability to compare and contrast information and interventions across geographic boundaries, and the reduction of costs for everyone involved, while maintaining local control

and decision-making with regard to the selection of health priorities and interventions chosen to address those priorities. Simultaneously, it will create opportunities for new and better ways to collaborate and partner with one another.

Upon receipt of generous funding support provided by The Duke Endowment, the Office of Health Access at ECU's Brody School of Medicine transferred administrative and operational responsibility for Health ENC to the Foundation for Health Leadership and Innovation in 2018. The project continues to be guided by a steering committee representing local health departments, hospitals and other stakeholders committed to improving the health of the people of eastern North Carolina.

#### **Member Organizations**

Health ENC is comprised of more than 40 organizations. Twenty-two hospitals, twenty-one health departments and two health districts participated in the regional CHNA.

#### **Partner Organizations**

- Foundation for Health Leadership & Innovation
- ECU Brody School of Medicine
- The Duke Endowment

#### Hospitals and Health Systems

- Cape Fear Valley Health (Cape Fear Valley Medical Center, Hoke Hospital and Bladen County Hospital)

- Nash County Health Department
- Onslow County Health Department
- Pamlico County Health Department
- Pitt County Health Department
- Sampson County Health Department
- Wayne County Health Department
- Wilson County Health Department

#### **Steering Committee**

Health ENC is advised by a Steering Committee whose membership is comprised of health department and hospital representatives participating in the regional CHNA, as well as other health care stakeholders from eastern North Carolina. The program manager oversees daily operations of the regional community health needs assessment and Health ENC.

#### Health ENC Program Manager

• Will Broughton, MA, MPH, CPH - Foundation for Health Leadership & Innovation

#### Health ENC Steering Committee Members

- Constance Hengel, RN, BSN, HNB-BC Director, Community Programs and Development, UNC Lenoir Health Care
- James Madson, RN, MPH Steering Committee Chair, Health Director, Beaufort County Health Department
- Battle Betts Director, Albemarle Regional Health Services
- Caroline Doherty Chief Development and Programs Officer, Roanoke Chowan Community Health Center
- Melissa Roupe, RN, MSN Sr Administrator, Community Health Improvement, Vidant Health
- Davin Madden Heath Director, Wayne County Health Department
- Angela Livingood Pharmacy Manager, Pender Memorial Hospital
- Lorrie Basnight, MD, FAAP Executive Director, Eastern AHEC, Associate Dean of CME, Brody School of Medicine
- Anne Thomas- President/CEO, Foundation for Health Leadership & Innovation

### HealthENC.org

The <u>Health ENC</u> web platform, shown in Figure 1, is a resource for the community health needs assessment process in eastern North Carolina. The website serves as a "living" data platform, providing public access to indicator data that is continuously updated, easy to understand and includes comparisons for context. Much of the data used in this assessment is available on <u>HealthENC.org</u> and can be downloaded in multiple formats. Results of the 2018 Eastern North Carolina Community Health Survey can be downloaded by county or the entire Health ENC Region.

In addition to indicator data, the website serves as a repository for local county reports, funding opportunities, 2-1-1 resources and more. Health departments, hospital leaders and community health stakeholders in the 33-county region are invited to use the website as a tool for community assessment, strategic planning, identifying best practices for improvement, collaboration and advocacy.

Visit **HealthENC.org** to learn more.

Figure 1. Health ENC Online Data Platform

#### **Consultants**

Health ENC commissioned Conduent Healthy Communities Institute (HCI) to assist with its Community Health Needs Assessment.

Conduent Healthy Communities Institute is a multi-disciplinary team of public health experts, including healthcare information technology veterans, academicians and former senior government officials, all committed to help health-influencing organizations be successful with their projects. Conduent HCI uses collaborative approaches to improve community health and provides web-based information systems to public health, hospital and community development sectors, to help them assess population health.

Conduent HCI works with clients across 38 states to drive improved community health outcomes by assessing needs, developing focused strategies, identifying appropriate intervention programs, establishing progress monitoring systems, and implementing performance evaluation processes. Working with diverse clients nationwide has contributed to Conduent HCI's national knowledge base of population health solutions. In addition, by engaging directly with clients and communities through the primary data collection process and final workshops, Conduent HCI works on behalf of our clients to build trust between and among organizations and their communities.

To learn more about Conduent HCI, please visit <a href="https://www.conduent.com/community-population-health/">https://www.conduent.com/community-population-health/</a>.

# Cumberland County Department Public Health / Cape Fear Valley Health Systems

The Cumberland County Department of Public Health has provided services to community residents since 1911. Funds for services the Department of Public Health offer come from Federal, State, and County tax money. Grants and fees for services also generate additional funds. The Health Department is governed by the Cumberland County Board of Health, which is composed of eleven members appointed by the Board of Commissioners.

The Cumberland County Department of Public Health and Cape Fear Valley Health Systems work in collaboration with Health ENC to participant in a comprehensive regional community health needs assessment and planning process collaborating with a wide range of community partners on during the Spring of 2018. This collaboration created a broad-range of partners (Human Service Agencies, Institutions of Higher Learning, and Non-Profits, etc.) to complete a comprehensive overview of the county's health.

The Community Health Needs Assessment (CHNA) describes the health of the community by identifying and presenting information on the community's health status, needs, and resources. Its goal is to describe the health needs of the community and to develop strategies to address those needs. The CNHA also identifies areas where better information is needed, especially information on health disparities among various subpopulations, and the quality of health care.

The CHNA is the basis for all local public health planning, giving the local health unit the opportunity to identify and interact with key community leaders, organizations and concerned residents about health priorities and needs. This information forms the basis of improving the health status of the community through a strategic community action plan.

The CHNA is conducted every three to four years to meet requirements for the Consolidated Agreement between the NC Division of Public Health and State Accreditation of Local Health Departments. As a part of the Affordable Care Act, Non-profit Hospitals are now required to conduct a Community Health (Needs) Assessment at least every three years. <a href="http://publichealth.nc.gov/lhd/cha/about.htm">http://publichealth.nc.gov/lhd/cha/about.htm</a>

#### **Community Health Team Structure**

Cumberland County Regional Community Health Assessment Team consisted multiple organizations and stakeholders within Cumberland County representing the following areas: government, health care, civic organizations, and nonprofits. The Cumberland County Community health Assessment Team is vital in assuring that the community has input into the collection process and review of health data/indicators, as well as the selection of the health priority areas for the County.

#### Distribution

Printed copies of the 2019 Community Health Needs Assessment will be made available at the local libraries, and local agencies that include the Cumberland County department of Public Health. To request a printed copy of this report , please contact the Cumberland County Department of Public Health's Health Education Unit at 910-433-3890. Electronic versions of this document will be available through the Cumberland County Department of Public Health's website,

http://www.co.cumberland.nc.us/departments/public-health-group/public-health and Cape Fear Valley Health's website, <a href="www.capefearvalley.com">www.capefearvalley.com</a>. In addition, an electronic copy of this report is available on <a href="HealthENC.org">HealthENC.org</a>.

## **Evaluation of Progress since Prior CHNA**

The community health improvement process should be viewed as an iterative cycle. An important piece of that cycle is revisiting the progress made on priority health topics set forth in the preceding community health needs assessment. By reviewing the actions taken to address priority health issues and evaluating the impact those actions have made in the community, it is possible to better target resources and efforts during the next round of the CHNA cycle.

As part of the 2016 Community Health Needs Assessment, Sexually Transmitted Infections, Teen Pregnancy Prevention, Chronic Disease, and Opioid and Substance Abuse were selected as prioritized health needs. A detailed table describing the strategies/action steps and indicators of improvement for each priority area can be found in Appendix A.

## **Community Feedback on Prior CHNA**

The 2016 Cumberland County Community Health Needs Assessment was made available to the public via http://www.co.cumberland.nc.us/departments/public-health-group/public-health/community-resources/reports . Community members were invited to submit feedback via contacting the Cumberland County Department of Public Health at 910-433-3600. No comments had been received on the preceding CHNA at the time this report was written.

## Methodology

#### **Overview**

Two types of data are analyzed for this Community Health Needs Assessment: secondary data and primary data. Secondary data is data that has been collected from other sources while primary data has been collected directly as a part of this report. Each type of data is analyzed using a unique methodology, and findings are organized by health topic areas. These findings are then synthesized for a comprehensive overview of the health needs in Cumberland County.

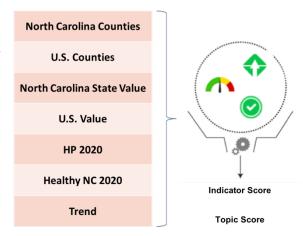

## **Secondary Data Sources & Analysis**

The main source of the secondary data used for this assessment is <a href="HealthENC.org">HealthENC.org</a>, a web-based community health platform developed by Conduent Healthy Communities Institute. The HealthENC dashboard brings non-biased data, local resources, and a wealth of information in one accessible, user-friendly location. The secondary data analysis was conducted using Conduent HCl's data scoring tool, and the results are based on the 155 health and quality of life indicators that were queried on the HealthENC dashboard on July 18, 2018. The data are primarily derived from state and national public data sources. For each indicator on the platform, there exist several comparisons to assess Cumberland

Health ENC is an online platform that provides access to health Figure 2. Secondary Data Scoring programs, funding opportunities and other resources aimed at improving community nearm. The platform is publicly available and can be accessed at <a href="http://www.healthenc.org/">http://www.healthenc.org/</a>.

County's status, including how Cumberland County compares to other communities, whether health targets have been met, and the trend of the indicator value over time.

Conduent HCI's data scoring tool systematically summarizes multiple comparisons to rank indicators based on highest need (Figure 2). For each indicator, the Cumberland County value is compared to a distribution of North Carolina and U.S. counties, state and national values, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over the four most recent time periods of measure. Each indicator is then given a score based on the available comparisons. The scores range from 0 to 3, where 0 indicates the best outcome and 3 indicates the worst outcome. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected from other communities, and changes in

methodology over time. The indicators are grouped into topic areas for a higher-level ranking of community health needs.

Please see Appendix B for further details on the secondary data scoring methodology.

## **Health and Quality of Life Topic Areas**

Table 2 shows the health and quality of life topic areas into which indicators are categorized. These topic areas are broadly based on the Healthy People 2020 framework, with each topic area containing multiple indicators. The five topic areas exhibiting the most significant need as evidenced by the secondary data analysis are included for in-depth exploration in the data findings. Four topic areas specific to population subgroups, including Children's Health, Men's Health, Women's Health, and Older Adults & Aging, include indicators spanning a variety of topics. If a particular subgroup receives a high topic score, it is not highlighted independently as one of the top 5 findings but is discussed within the narrative as it relates to highly impacted populations. Three additional categories (County Health Rankings, Mortality Data, and Wellness & Lifestyle) are not considered for in-depth exploration, since all three are general categories that include indicators spanning a wide variety of topics. Topic areas with fewer than three indicators are considered to have data gaps and do not receive topic scores. These topics are indicated by an asterisk in Table 2.

**Table 2. Health and Quality of Life Topic Areas** 

Access to Health Services	Family Planning*	Prevention & Safety
Cancer	Food Safety*	Public Safety
Children's Health	Heart Disease & Stroke	Respiratory Diseases
County Health Rankings	Immunizations & Infectious Diseases	Social Environment

Environment	Older Adults & Aging	Wellness & Lifestyle
Environmental & Occupational Health	Other Chronic Diseases	Women's Health
Exercise, Nutrition, & Weight	Oral Health*	

<sup>\*</sup>Topic area has fewer than 3 indicators and is considered a data gap. No topic score is provided.

## **Health ENC Region Comparison**

When available, county-level data are compared to the state of North Carolina, as well as Health ENC Counties. The Health ENC region consists of 33 counties in eastern North Carolina participating in the regional CHNA: Beaufort, Bertie, Bladen, Camden, Carteret, Chowan, Cumberland, Currituck, Cumberland, Duplin, Edgecombe, Franklin, Gates, Greene, Halifax, Hertford, Hoke, Hyde, Johnston, Lenoir, Martin, Nash, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Sampson, Tyrrell, Washington, Wayne and Wilson. Values for the Health ENC region were calculated by aggregating data from these 33 counties.

## **Primary Data Collection & Analysis**

To expand upon the information gathered from the secondary data, Health ENC Counties collected community input. Primary data used in this assessment consists of focus groups and both an English-language and Spanish-language community survey. All community input tools are available in Appendix C.

#### **Community Survey**

Community input was collected via a 57-question online and paper survey available in both English and Spanish. Survey Monkey was the tool used to distribute and collect responses for the community survey. Completed paper surveys were entered into the Survey Monkey tool.

The community survey was distributed across Health ENC's entire survey area from April 18, 2018 – June 30, 2018.

#### Survey Distribution

The Cumberland County survey was distributed to all community partners and stakeholder organizations including: Fayetteville State University, Methodist University, Fayetteville Metropolitan Housing Authority, Department of Social Services, Community Health Interventions and Sickle Cell Agency, Parks and Recreation sites, Cumberland County Public Libraries, faith based organizations, senior support groups, homeless care and support organizations, Cape Fear Valley Health Services and Cumberland County Department of Public Health. Each organization provided paper and electronic opportunities to participate in the survey and asked to distribute the survey to their respective communities served. QR Codes were given out when participants were unable to take the survey immediately, and opportunities to take the survey on a laptop were made available in the Cumberland County Department of Public Health lobby. The survey was advertised using Cumberland County Public Information Office — via the Cumberland County website, collaborating agencies website and a press release to involve citizens. There were no incentives provided for participating in the survey.

Table 3 summarizes the number of survey respondents. A total of 18,917 responses were collected across all 33 counties, with a survey completion rate of 86.5%, resulting in 16,358 complete responses across the entire survey area. A total of 1466 responses were collected from Cumberland County residents, with a survey completion rate of 87%, resulting in 1273 complete responses from Cumberland County. The survey analysis included in this CHNA report is based on complete responses.

**Table 3. Survey Respondents** 

	Number of Respondents*		
Service Area	English Survey	Spanish Survey	Total
All Health ENC Counties	15,917	441	16,358
Cumberland County	1265	8	1273

<sup>\*</sup>Based on complete responses

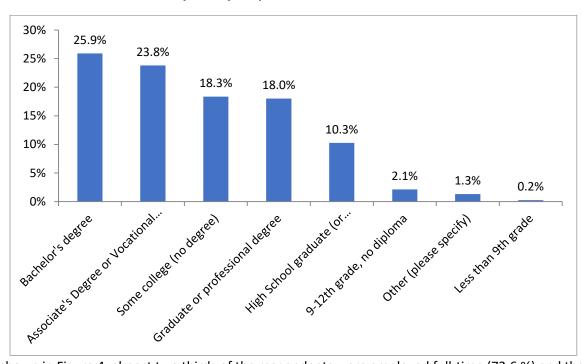

Survey participants were asked a range of questions related - but not limited - to: what populations are most negatively affected by poor health outcomes in Cumberland County, what their personal health challenges are, and what the most critical health needs are for Cumberland County. The survey instrument is available in Appendix C.

#### Demographics of Survey Respondents

The following charts and graphs illustrate Cumberland County demographics of the community survey respondents.

Among Cumberland County survey participants, just over half of respondents were over the age of 50, with the highest concentration of respondents (14.5%) grouped into the 55-59 age group. The majority of respondents were female (74.7%), White (77.5%), spoke English at home (98.5%), and Not Hispanic (94.6%).

Survey respondents had varying levels of education, with the highest share of respondents (25.9 %) having a bachelor's degree and the next highest share of respondents (#23.8%) having a associate's degree of vocational training (Figure 3).

**Figure 3. Education of Community Survey Respondents** 

As shown in Figure 4, almost two thirds of the respondents were employed full-time (72.6 %) and the highest share of respondents (27.2%) had household annual incomes that totaled over \$100,000 before taxes. The average household size was 2.9 individuals.

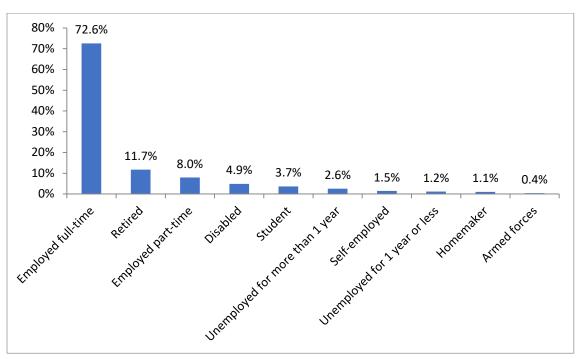

Figure 4. Employment Status of Community Survey Respondents

Figure 5 shows the health insurance coverage of community survey respondents. More than half of survey respondents have health insurance provided by their employer (63.9%) or the military/Tricare/VA (16.7%), while 12.9% have Medicare and 5.1% have no health insurance of any kind.

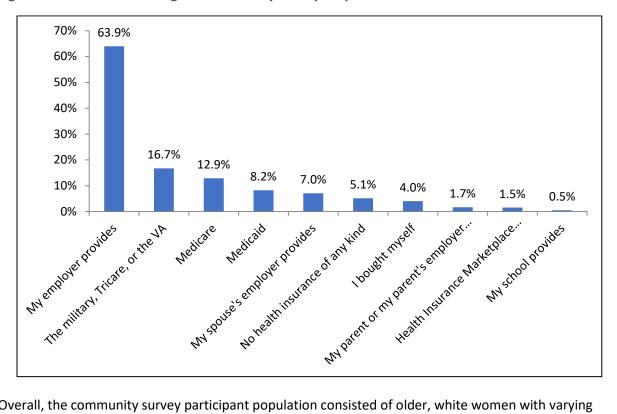

Figure 5. Health Care Coverage of Community Survey Respondents

Overall, the community survey participant population consisted of older, white women with varying levels of education and income. The survey was a convenience sample survey, and thus the results are not representative of the community population as a whole.

Key findings from select questions on the community survey are integrated into this report by theme or topic area, with an emphasis on the most significant needs as evidenced by both primary and secondary data. This approach is intended to offer a meaningful understanding of health needs. A summary of full survey results (all 57 questions) is available on <a href="HealthENC.org">HealthENC.org</a>. Full results can be downloaded by county or for the entire Health ENC Region.

#### **Focus Group Discussions**

Another form of community input was collected through focus groups. Focus groups are carefully constructed dialogues that invite diverse groups of people to discuss important and pressing issues. Focus groups provide community members an opportunity to engage in productive learning and sharing sessions. Focus group discussions focused on community strengths, opportunities for improvement, existing resources, health needs, and possible solutions for improving the health of Cumberland County. A list of questions asked at the focus groups is available in Appendix C.

The purpose of the focus groups for Health ENC's 2019 CHNA/CHA was to engage with a broad cross-section of individuals from each county, such as migrant worker groups, healthcare workers, or county employees, to name a few.

Conduent HCl consultants developed a Focus Group Guide and led training webinars for Health ENC members. Topics included facilitation techniques, moderator and note taker roles, as well as tips and expectations for documenting focus group discussions. The list of focus group questions was reviewed and a transcript was provided for documentation purposes.

The Cumberland County targeted specific parts of the county to participate based on geographic location from City of Fayetteville. Four townships were targeted- Spring Lake, Eastover/ Steadman/ Wade, Hope Mills and Grays Creek communities.

Focus group information was shared through collaborating agencies including: Fayetteville State University, Methodist University, Fayetteville Metropolitan Housing Authority, Department of Social Services, Community Health Interventions and Sickle Cell Agency, Parks and Recreation sites, Cumberland County Public Libraries, faith based organizations, senior support groups, homeless care and support organizations, Cape Fear Valley Health Services and Cumberland County Department of Public Health from May 1, 2019 until July 1, 2019. The focus groups were advertised using Cumberland County Public Information Office — via the Cumberland County website, collaborating agencies website and a press release to involve citizens. There were light refreshments served to participants as an incentive for participation.

Six focus group discussions were completed within Cumberland County between June 15, 2018 – July 19, 2018 with a total of 54 individuals. Participants included senior citizens, young adults, and members of the general population. Table 4 shows the date, location, population type, and number of participants for each focus group.

**Table 4. List of Focus Group Discussions** 

Date Conducted	Focus Group Location	Population Type	Number of Participants
6/27/2018	Greys Creek Recreation Center	General Population	12
6/15/2018	Lake Rim Recreation Center	Senior Citizens	12
6/28/2018	Falling Run Baptist Church	Senior Citizens	7
7/16/2018	Spring Lake Recreation Center	Senior Citizens, Young Adults, Local Council Person	5
7/18/2018	Hope Mills Library	General Population	9
7/19/2018	Eastover Central Community Recreation Center	General Population	9

Focus group transcripts were coded and analyzed by common theme. The frequency with which a topic area was discussed in the context of needs and concerns or barriers and challenges to achieving health was used to assess the relative importance of the need in the community. Key themes that emerged from the focus group discussions are integrated into this report by topic area, with an emphasis on the

most significant needs as evidenced by both primary and secondary data. A deeper analysis of focus group findings is available on <a href="HealthENC.org">HealthENC.org</a>

Results of the focus group dialogues further support the results from other forms of primary data collected (the community survey) and reinforces the findings from the secondary data scoring. By synthesizing the discussions that took place at the focus groups in correlation with the responses from the community survey, the primary data collection process for Cumberland County is rich with involvement by a representative cross section of the community.

#### **Data Considerations**

Several limitations of the data should be considered when reviewing the findings presented in this report. Although the topics by which data are organized cover a wide range of health and health-related areas, within each topic there is a varying scope and depth of data availability. In some topics there is a robust set of secondary data indicators, but in others there may be a limited number of indicators for which data is collected, or limited subpopulations covered by the indicators.

Data scores represent the relative community health need according to the secondary data that is available for each topic and should not be considered to be a comprehensive result on their own. In addition, these scores reflect what was found in the secondary data for the population as a whole, and do not factor in the health or socioeconomic need that is much greater for some subpopulations. In addition, many of the secondary data indicators included in the findings are collected by survey, and though methods are used to best represent the population at large, these measures are subject to instability—especially among smaller populations. The infant mortality rate indicator was corrected after the development of the content for this report. The values have been updated here and the impact was determined to be minimal to the analysis overall.

The disparities analysis, used to analyze the secondary data, is also limited by data availability. In some instances, data sources do not provide subpopulation data for some indicators, and for other indicators, values are only available for a select number of race/ethnic groups. Due to these limitations, it is not possible to draw conclusions about subpopulation disparities for all indicators.

The breadth of primary data findings is dependent on several factors. Focus group discussion findings were limited by which community members were invited to and able to attend focus group discussions, as well as language barriers during discussion for individuals whose native language is not English. Because the survey was a convenience sample survey, results are vulnerable to selection bias, making findings less generalizable for the population as whole.

#### **Prioritization**

After receiving the completed Community Health Needs Assessment from Conduent HCl, a Cumberland County Community Coalition was convened on February 6, 2019 as the Cumberland County Department of Public Health. Twenty-six agency representatives and community partners attended the Community Coalition priority selection process meeting.

The Community Coalition invitees included community leaders, public health agencies, businesses, hospitals, private practitioners, behavioral health providers, and academic centers. Agencies invited to attend the Cumberland County Community Coalition Selection process include the following:

- Action Pathways
- Cumberland County Department of Social Sesrvices
- Cumberland County Schools
- Cumberland County Public Library
- Cumberland County Partnership for Children
- Falcon Town Management
- Fayetteville Urban Ministry
- Fayetteville City Management
- Gamma Upsilon Zeta, Inc.
- Insight North Carolina
- Manna Church, Fayetteville-Fort Bragg Region
- Planned Parenthood
- Spring Lake Town Management
- Veteran's Services

#### **Prioritization Process**

The team highlighted key factors and conditions that will have a great impact on the health of the community from each section of the CHNA Survey. To determine which health concerns are priorities, the Community Coalition reviewed outcomes and findings from the CHNA Surveys and utilized results based accountability approach to estimate which areas of need are of greatest concern.

Those factors and conditions included the following:

- Affordable Healthcare
- Safe Environment
- Access to available resources (and transportation)
- Sustainable wages or innovative job opportunities
- Family Supports
- Active Transportation

Community Coalition participants were given a list of health concerns identified from the CHNA, and asked to rank them again as to what problem they wanted to see changed first, second, etc.

#### Results

At the conclusion of the prioritization process, the Community Coalition identified five health needs as the key areas for action.

- Access to Health Services
- Economy (employment, housing, food security, and living below poverty)
- Exercise, weight, and nutrition
- Public Safetv
- Substance Abuse

Furthermore, to solidify the priority selection, a public survey was used to rank the significant health needs as identified from the CHNA. The top three priorities from the public input survey included (in order of priority):

Economy (employment, housing, food security, and living below poverty)

- Access to Health Services
- Public Safety.

## **Overview of Cumberland County**

## **About Cumberland County**

Cumberland County is located in the southeastern section of the North Carolina and is bordered by Sampson, Bladen, Robeson, Hoke, Harnett and Moore counties. The current land area of Cumberland County is 652.32 square miles. The county was named in honor of William Augustus, Duke of Cumberland, and third son of King George II. Cumberland was the commander of the English Army at the Battle of Culloden, in which the Scotch Highlanders were defeated in 1746.

The county seat was first called Cumberland Court House. In 1762, Campbellton was established at Cross Creek with provisions for the public buildings. In 1778, Cross Creek and Campbellton were joined and the courthouse was ordered to be erected in that part of the town known as Cross Creek. In 1783, Campbellton was changed to Fayetteville in honor of Lafayette. Currently, Fayetteville is the County's seat and its largest municipality. Additional municipalities in Cumberland County are Eastover, Falcon, Godwin, Hope Mills, Linden, Spring Lake, Stedman and Wade.

Cumberland County consists of 664 square miles located in the upper coastal plain section of the State, this area is better known as the "Sandhills". Elevations in Cumberland County range from 40 to 486 feet above sea level. Cumberland County has progressed from its beginnings as a river front distribution center to a highly commercialized area offering a variety of services to its citizens. Fayetteville is located in the Coastal Plain at the foot of North Carolina's Piedmont plateau. The city, located next to the Cape Fear River, is 107 feet above sea level.

#### Climate

The overall climate of Cumberland County is comparable to other communities in the Carolinas, with pleasant spring and fall seasons, mild winters and hot summers. Snow and sleet are rare and even freezing temperatures normally occur only during the months of December through February. Although hurricanes do occur along the coast of North Carolina, and can wreak damage far inland, only 9 hurricanes in the past 50 years have had a significant impact on Cumberland County. Fayetteville is 90 miles from the closest point on the NC coast, and the effect of storms is usually limited to water damage caused by heavy rains.

Cumberland County gets 46 inches of rain per year. Snowfall is 2 inches. The number of days with any measurable precipitation is 106. On average, there are 217 sunny days per year in Cumberland County. The July high is around 91 degrees. The January low is 31. Our comfort index, which is based on humidity during the hot months, is a 32 out of 100, where higher is more comfortable.

Fort Bragg is one of the U.S. Army's largest installations in the world. The installation covers about 161,000 acres, or 251 square miles, stretching into six counties.

Fort Bragg underwent significant change in the 1990s. From the removal of wooden barracks to building construction/renovation through expansion of training areas into the newly purchased Overhills site, Fort Bragg greeted the new century with a fresh appearance.

Since 2000, Fort Bragg Soldiers have participated in combat and humanitarian operations in countries around the world. Fort Bragg responded to provide support to those impacted by Hurricane Katrina in 2005 and in Haiti after the 2010 earthquake. Fort Bragg serves a vital role in the war on terror, deploying and supporting more troops than any other post, in support of Operations Enduring Freedom, Iraqi Freedom and New Dawn.

Fort Bragg continues to invest to modernize and expand facilities. The 82nd Airborne Division's 1955 barracks complex was replaced with modern buildings. Office buildings and barracks have also been constructed for units recently added to the division. A new headquarters building was constructed on Knox and Randolph Streets for the U.S. Army Forces Command (FORSCOM) and the U.S. Army Reserve Command. These two major commands moved to Fort Bragg in 2011 when Fort Macpherson, Georgia, was closed under the Base Realignment and Closure (BRAC) legislation. BRAC moves also resulted in the 7th Special Forces Group completing their relocation from Fort Bragg to Eglin Air Force Base, Florida. Today Fort Bragg, "the Home of the Airborne and Special Operations," with approximately 57,000 military personnel, 11,000 civilian employees and 23,000 family members is one of the largest military complexes in the world. <a href="https://www.bragg.army.mil/index.php/about/fort-bragg-history-Retrieved on Oct. 20,2016">https://www.bragg.army.mil/index.php/about/fort-bragg-history-Retrieved on Oct. 20,2016</a>

#### **Cumberland County Government**

The County of Cumberland functions under a Board of Commissioners – County Manager form of government. The Board of County Commissioners consists of seven members. Two members are elected from District 1 which follows the 17<sup>th</sup> House District line, three members from District 2 which follows the 18<sup>th</sup> House District line, and two members at large. Each member of the board is elected for a four-year term. The terms are staggered with two members from District 1 and two members at large elected in a biennial general election, and three members from district 2 elected two years later. The chairman and vice chairman are elected by the members on a yearly basis. The Board is the policy-making and legislative authority for Cumberland County. They are responsible for adopting the annual budget, establishing the tax rate, approving zoning and planning issues and other matters related to health, welfare and safety of citizens.

The Board of Commissioners meets twice a month, the first Monday of each month at 9 a.m. and the third Monday of the month at 7 p.m. The board holds special meetings, when necessary. The meetings are advertised in advance. The meetings are open to the public and are held in the Commissioners' meeting room on the first floor of the County Courthouse located on Dick Street. The agenda for each regular scheduled Board meeting is normally available on the Thursday prior to the Monday meeting on the county web site; <a href="https://www.co.cumberland.nc.us">www.co.cumberland.nc.us</a>.

The County Manager is appointed by, and serves at the pleasure of the Board of Commissioners. The County Manager is the Chief Executive Officer and has the responsible for implementing policies and procedures of the Board, delivery of services, managing daily operations and appointment of subordinate department managers. Source: 2013 Community Health Assessment.

## **Demographic Profile**

The demographics of a community significantly impact its health profile. Population growth has an influence on the county's current and future needs. Specific population subgroups, including veterans and different age, gender, race and ethnic groups, may have unique needs and require varied approaches to health improvement efforts. The following section explores the demographic profile of Cumberland County, North Carolina.

#### **Population**

According to the U.S. Census Bureau's 2016 population estimates, Cumberland County has a population of 327,127 (Figure 6). While the population of Cumberland County has decreased from 2013 to 2015, the population has increased from 2015 to 2016.

Figure 6. Total Population (U.S. Census Bureau)

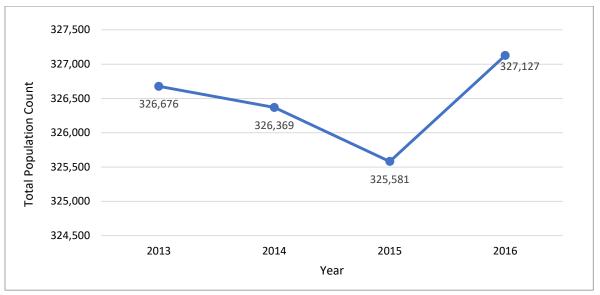

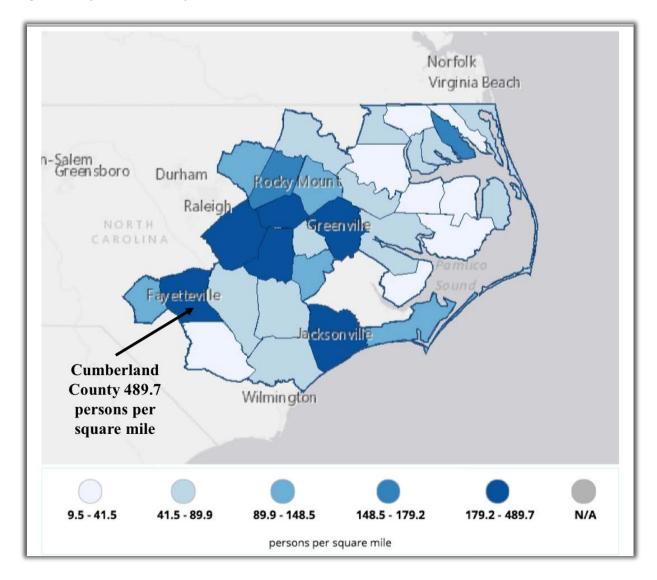

Figure 7 shows the population density of Cumberland County. Compared to all 33 counties in the Health ENC region, Cumberland County has the highest population density of 489.7 persons per square mile.

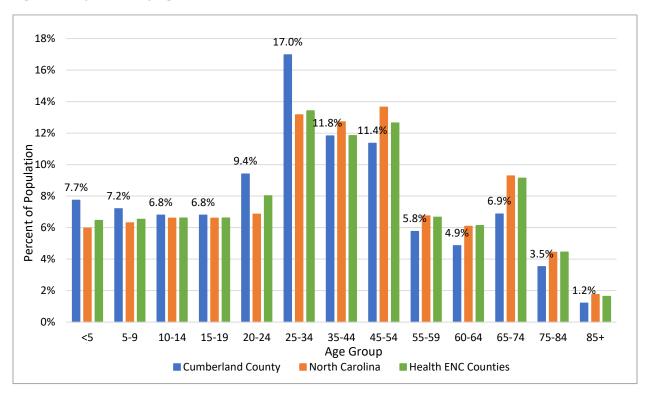

Figure 7. Population Density of Health ENC Counties (U.S. Census Bureau, 2010)

#### **Age and Gender**

Overall, Cumberland County residents are younger than residents of North Carolina and the Health ENC region. Figure 8 shows the Cumberland County population by age group. The 25-34 age group contains the highest percent of the population at 17.0%, while the 35-44 age group contains the next highest percent of the population at 11.8%.

People 65 years and older comprise 11.6% of the Cumberland County population, compared to 15.5% in North Carolina and 15.2% in the Health ENC counties (Figure 9).

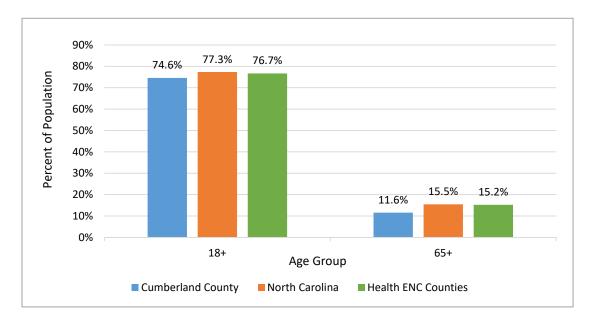

Figure 9. Population 18+ and 65+ (U.S. Census Bureau, 2016)

Males comprise 49.0% of the population, whereas females comprise 51.0% of the population (Table 5). The median age for males is 29.8 years, whereas the median age for females is 34.0 years. Both are noticeably lower than the North Carolina median age (37.2 years for males and 40.1 years for females).

Table 5. Population by Gender and Age (U.S. Census Bureau, 2016)

	Percent of Total Population		Percent of Male Population		Percent of Female Population		Median Age (Years)	
	Male	Female	18+	65+	18+	65+	Male	Female
<b>Cumberland County</b>	49.0%	51.0%	73.8%	9.9%	75.4%	13.2%	29.8	34.0
North Carolina	48.6%	51.4%	76.3%	13.9%	78.4%	17.0%	37.2	40.1
Health ENC Counties	49.2%	50.8%	75.8%	13.5%	77.5%	16.9%	N/A	N/A

#### **Birth Rate**

Birth rates are important measures of population health. The birth rate is usually the dominant factor in determining the rate of population growth; however, population growth is also driven by the age structure of the population (e.g., deaths), immigration and emigration. Figure 10 illustrates that the birth rate in Cumberland County (16.7 live births per 1,000 population in 2016) is higher than the birth rate in North Carolina (12.0) and Health ENC counties (13.1). Further, birth rates have decreased slightly over the past three measurement periods in all three jurisdictions.

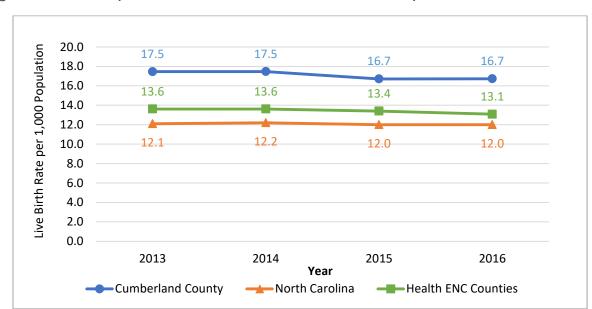

Figure 10. Birth Rate (North Carolina State Center for Health Statistics)

#### Race/Ethnicity

The race and ethnicity composition of a population is important in planning for future community needs, particularly for schools, businesses, community centers, health care and child care. Race and ethnicity data are also useful for identifying and understanding disparities in housing, employment, income and poverty.

Figure 11 shows the racial and ethnic distribution of Cumberland County compared to North Carolina and Health ENC counties. The first six categories (White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian & Other Pacific Islander and Multiracial) are racial groups and may include persons that identify as Hispanic or Latino. The seventh category (Hispanic or Latino) is an ethnic group and may include individuals that identify as any race.

The proportion of residents that identify as White is smaller in Cumberland County (51.8%) as compared to North Carolina (71.0%) and Health ENC counties (63.8%). Cumberland County has a larger share of residents that identify as Black or African American (38.7%) when compared to North Carolina (22.2%) and Health ENC counties (30.7%). The Hispanic or Latino population comprises 11.3% of Cumberland County, which is a larger proportion than the Hispanic or Latino population in North Carolina (9.2%) and Health ENC counties (9.6%).

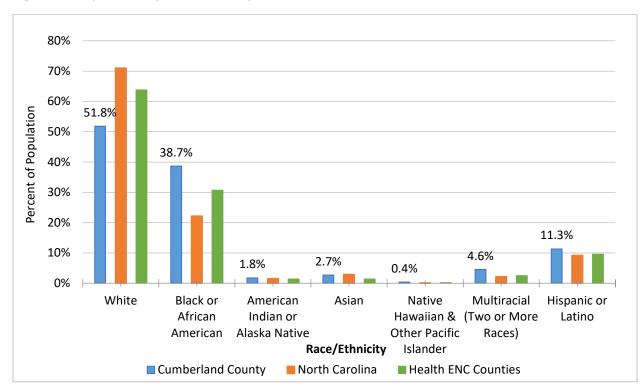

Figure 11. Population by Race/Ethnicity (U.S. Census Bureau, 2016)

### **Tribal Distribution of Population**

The U.S. Census Bureau collects population estimates for various American Indian and Alaska Native (AIAN) tribes. While population estimates of tribal data are not available at the county level, Table 6 shows the population estimates of eight tribal areas throughout the state of North Carolina.

Table 6. Named Tribes in North Carolina (American Community Survey, 2012-2016)

State Designated Tribal Statistical Area (SDTSA)	Total Population		
Coharie SDTSA	62,160		
Eastern Cherokee Reservation	9,613		
Haliwa-Saponi SDTSA	8,700		
Lumbee SDTSA	502,113		
Meherrin SDTSA	7,782		
Occaneechi-Saponi SDTSA	8,938		
Sappony SDTSA	2,614		
Waccamaw Siouan SDTSA	2,283		

#### **Military Population**

Figure 12 shows the percent of the population 16 years of age and older in the military (armed forces). In 2012-2016, Cumberland County has a larger share of residents in the military (10.1%) compared to North Carolina (1.0%) and counties in the Health ENC region (4.0%). While the percent of the population in the military in Cumberland County has decreased over the four most recent measurement periods, it is still noticeably higher than in North Carolina and the Health ENC region across the same timeframe.

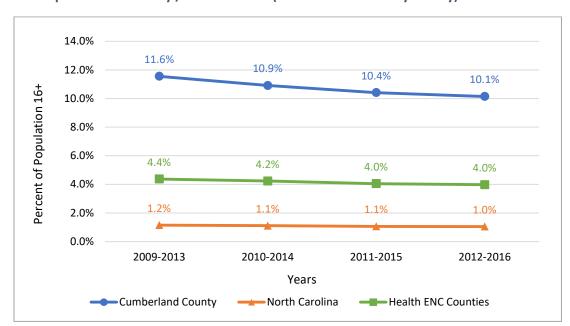

Figure 12. Population in Military / Armed Forces (American Community Survey)

### **Veteran Population**

The veteran population is given as a percent of the civilian population aged 18 years and older and this data is used for policy analyses, to develop programs, and to create budgets for veteran programs and facilities. Cumberland County has a veteran population of 19.8% in 2012-2016, compared to 9.0% for North Carolina and 12.4% for Health ENC counties (Figure 13). The veteran population of Cumberland County, North Carolina, and the Health ENC region is decreasing slightly across four time periods from 2009-2013 to 2012-2016.

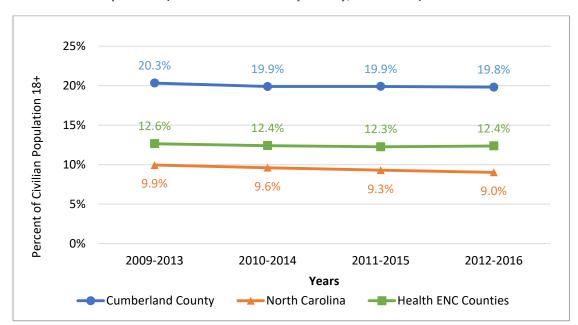

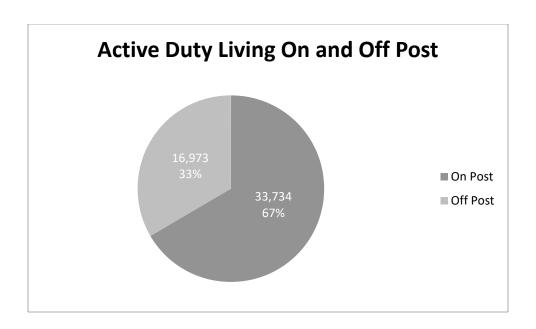

Figure 13. Veteran Population (American Community Survey, 2012-2016)

Fort Bragg is one of the U.S. Army's largest installations in the world. The installation covers about 161,000 acres, or 251 square miles, stretching into six counties. Fort Bragg community members primarily live in eight different counties with 68 percent living in Cumberland County. Fort Bragg continues to invest to modernize and expand facilities. The 82nd Airborne Division's 1955 barracks complex was replaced with modern buildings. Office buildings and barracks have also been constructed for units recently added to the division. A new headquarters building was constructed on Knox and Randolph Streets for the U.S. Army Forces Command (FORSCOM) and the U.S. Army Reserve Command. These two major commands moved to Fort Bragg in 2011 when Fort Macpherson, Georgia, was closed under the Base Realignment and Closure (BRAC) legislation. BRAC moves also resulted in the 7th Special Forces Group completing their relocation from Fort Bragg to Eglin Air Force Base, Florida. Today Fort Bragg, "the Home of the Airborne and Special Operations," with approximately 33,734 Active Duty personnel living off post (67 percent) and 16,973 Active Duty personnel living on the Fort Bragg post (33 percent) as of March 2018. There are 15,342 military dependents and 534 non-Active Duty personnel living on the Fort Bragg post. (Fort Bragg Department of Public Health Community Health Assessment -2018).

## Socioeconomic Profile

Social and economic factors are well known to be strong determinants of health outcomes – those with a low socioeconomic status are more likely to suffer from chronic conditions such as diabetes, obesity and cancer. Community health improvement efforts must determine which subpopulations are most in need in order to effectively focus services and interventions.

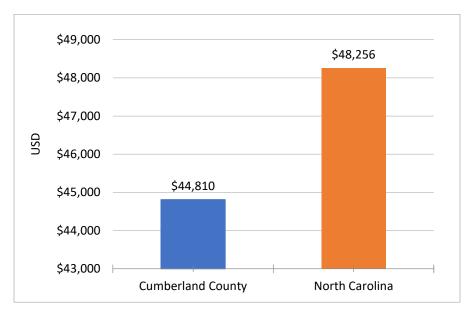

## **NC Department of Commerce Tier Designation**

The North Carolina Department of Commerce annually ranks the state's 100 counties based on economic well-being and assigns each a Tier designation. The 40 most distressed counties are designated as Tier 1, the next 40 as Tier 2 and the 20 least distressed as Tier 3. Cumberland County has been assigned a Tier 2 designation for 2018.

#### **Income**

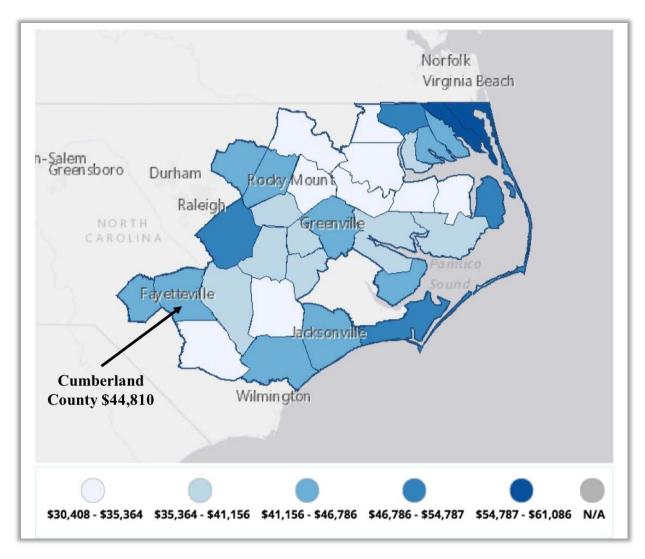

Median household income reflects the relative affluence and prosperity of an area. Areas with higher median household incomes are likely to have a greater share of educated residents and lower unemployment rates. Figure 14 shows the median household income in Cumberland County (\$44,810), which is lower than the median household income in North Carolina (\$48,256).

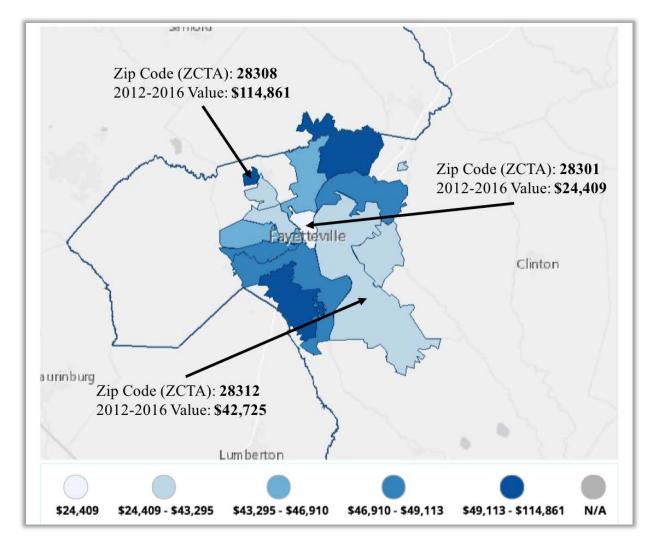

Cumberland County has a similar median household income compared to other counties in the Health ENC region (Figure 15).

Figure 15. Median Household Income of Health ENC Counties (American Community Survey, 2012-2016)

Within Cumberland County, zip code 28301 has the lowest median household income (\$24,409) while zip code 28308 has the highest median household income (\$114,861) (Figure 16).

Figure 16. Median Household Income by Zip Code (American Community Survey, 2012-2016)

## **Poverty**

Federal poverty thresholds are set every year by the Census Bureau and vary by size of family and ages of family members. A high poverty rate is both a cause and a consequence of poor economic conditions. Children in poverty are more likely to have physical health problems, behavioral problems and emotional problems. Seniors who live in poverty are an especially vulnerable group due to increased physical limitations, medical needs, and social isolation. Persons with a disability are more likely to live in poverty compared to the rest of the population. Without adequate income, individuals with disabilities may not be able to afford necessary expenses, such as rent or mortgage, utility bills, medical and dental care, and food.

As seen in Figure 17, 17.6% percent of the population in Cumberland County lives below the poverty level, which is slightly higher than the rate for North Carolina (16.8% of the population) and slightly lower than the Health ENC region (19.2%).

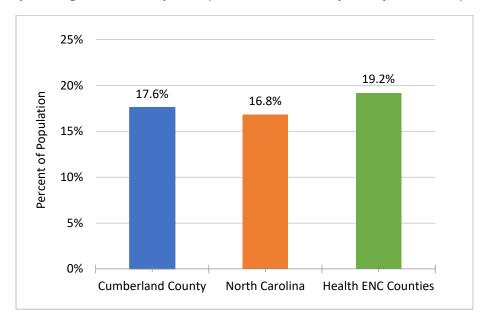

Figure 17. People Living Below Poverty Level (American Community Survey, 2012-2016)

As shown in Figure 18, the rate of children living below the poverty level is also higher for Cumberland County (25.7%) when compared to North Carolina (23.9%) but lower when compared to Health ENC counties (27.6%).

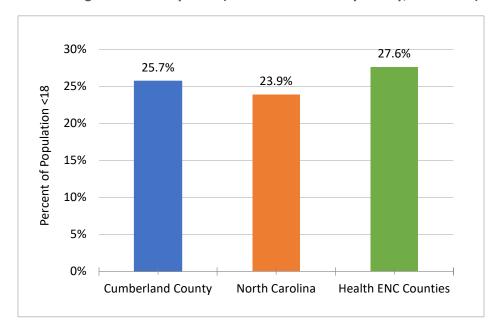

Figure 18. Children Living Below Poverty Level (American Community Survey, 2012-2016)

Similarly, as shown in Figure 19, the rate of older adults living below the poverty level is higher in Cumberland County (10.2%) than in North Carolina (9.7%), but lower than the Health ENC region (11.5%).

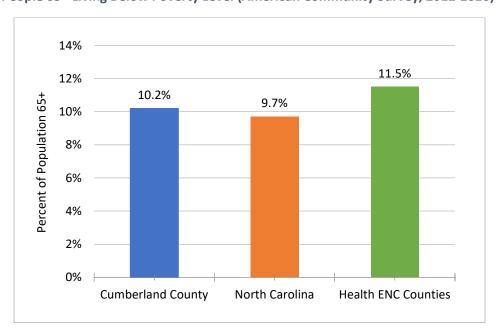

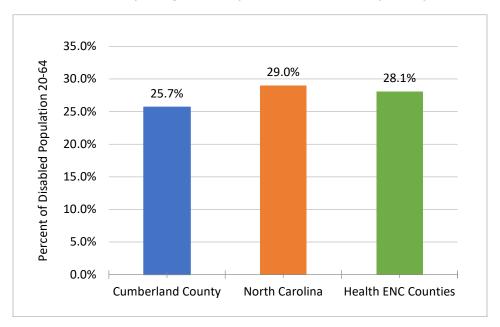

Figure 19. People 65+ Living Below Poverty Level (American Community Survey, 2012-2016)

As shown in Figure 20, the percent of disabled people living in poverty in Cumberland County (25.7%) is lower than the rate for North Carolina (29.0%) and Health ENC counties (28.1%).

Figure 20. Persons with Disability Living in Poverty (American Community Survey, 2012-2016)

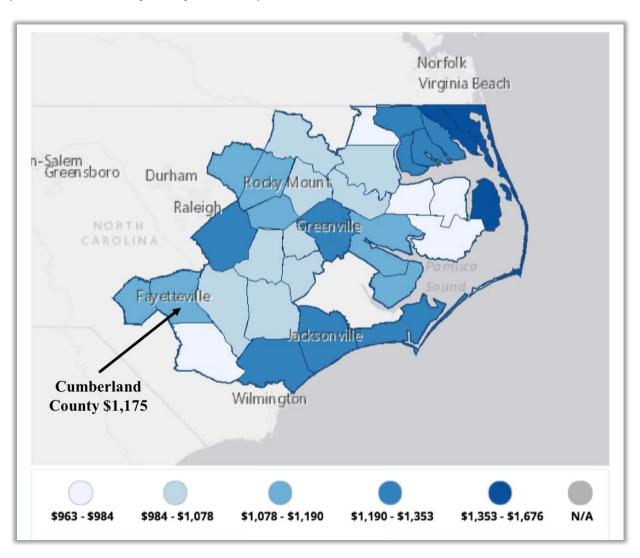

### Housing

The average household size in Cumberland County is 2.6 people per household, which is similar to the North Carolina value of 2.5 people per household.

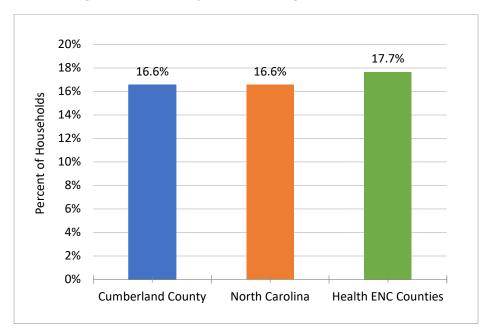

High costs of homeownership with a mortgage can strain both homeowners and the local housing market. Figure 21 shows mortgaged owners median monthly household costs in the Health ENC region. In Cumberland County, the median housing costs for homeowners with a mortgage is \$1,175, which is similar to other counties in the Health ENC region.

Figure 21. Mortgaged Owners Median Monthly Household Costs, Health ENC Counties (American Community Survey 2012-2016)

Safe and affordable housing is an essential component of healthy communities, and the effects of housing problems are widespread. Figure 22 shows the percent of households with at least one of the following problems: overcrowding, high housing costs, lack of kitchen, or lack of plumbing facilities. Countywide, 16.6% of households have severe housing problems. This is the same rate as in North Carolina (16.6% of households) and slightly lower than in Health ENC counties (17.7% of households).

Figure 22. Severe Housing Problems (County Health Rankings, 2010-2014)

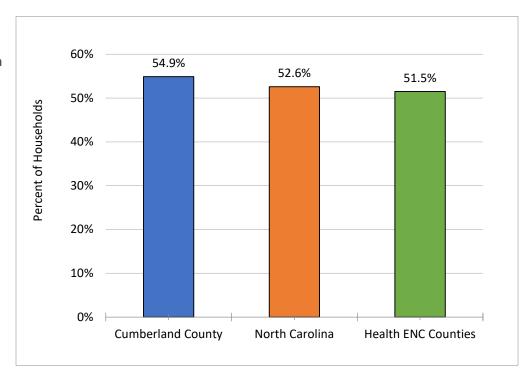

## **Food Insecurity**

The Supplemental Nutrition Assistance Program (SNAP) is a federal assistance program that provides low-income families with electronic benefit transfers (EBTs) that can be used to purchase food. The goal of the program is to increase food security and reduce hunger by increasing access to nutritious food.

Figure 23 shows the percent of households with children that participate in SNAP. The rate for Cumberland County, 54.9%, is higher than the state value of 52.6% and the Health ENC region value of 51.5%.

Figure 23.
Households with
Children
Receiving SNAP
(American
Community
Survey, 20122016)

## **Employment**

As of 2018, Cumberland County has over 6,200 employment establishments (US Bureau of Labor 2018). The average weekly wage for the 120,936 workers is approximately \$820 (US Bureau of Labor 2018). The largest ten employers are U.S. Department of Defense – Civilians, Cape Fear Valley Health Systems, Cumberland County Schools, Wal-Mart Associates, In, Goodyear Tire and Rubber Company, Cumberland County Government, City of Fayetteville, Veterans Administration, Fayetteville Technical Community College, and Manm and Hummel (Cumberland County Finance Department 2018).

Figure 24 shows approximately the number of employees the ten largest employers within Cumberland County. These employers account for 34.55% of total employment for civilians (Cumberland County Finance Department 2018).

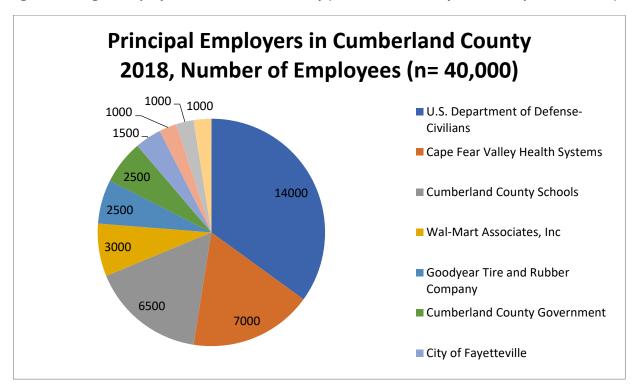

Figure 24. Largest Employers in Cumberland County (Cumberland County Finance Department 2018)

The top five employment occupational groups in Food prepation and serving related occupations (including Fast Food) (5,660), Retail Salesperson (5, 460), Cashiers (3,900), Office Clerks, General (3,440) and Registered Nurses (3,290) (North Carolina Department of Commerce Labor and Economic Analysis 2017). In contrast the top five best paying occupations in Cumberland County are: Family and General practitioners, nurse anesthetics, Dentists (General), Architects and Engineering Managers, and Optometrists (North Carolina Department of Commerce Labor and Economic Analysis 2017).

Healthcare practioners and technical occupations (9,600), and Education, Training and Library Occupations (9,470) (North Carolina Department of Commerce Labor and Economic Analysis 2017). The best There are also approximately 10, 155 men-owned firms, 8,867 women-owned firms, 8,774

minority-owned firms (compared to 11,540 nonminority- owned), and 3,095 veteran-owned firms (compared to the 16,822 non veteran owned firms) (U.S. Department of Commerce 2018).

The unemployment rate for Cumberland County has been slowly declining from 7.6 % in 2015 to approximately 5.0% as of December 2018, for unemployed workers in the civilians workforce (NC Commerce 2019). There are approximately 7,590 citizen unemployed as compared to 120,401 employed in the Cumberland County workforce (North Carolina Department of Commerce Labor and Economic Analysis 2017).

#### SocioNeeds Index

Conduent Healthy Communities Institute developed the SocioNeeds Index® to easily compare multiple socioeconomic factors across geographies. This index incorporates estimates for six different social and economic determinants of health – income, poverty, unemployment, occupation, educational attainment, and linguistic barriers – that are associated with poor health outcomes including preventable hospitalizations and premature death.

Zip codes within Cumberland County are assigned an index value from 0 (low need) to 100 (high need), based on how those zip codes compare to others in the U.S. Within Cumberland County, the zip codes are then ranked from 1 (low need) to 5 (high need) to identify the relative level of need. Zip codes with populations under 300 persons are excluded. Zip code 28301, with an index value of 96.8, has the highest level of socioeconomic need within Cumberland County. This is illustrated in Figure 24. Index values and the relative ranking of each zip code within Cumberland County are provided in Table 7.

Figure 25. SocioNeeds Index® (Conduent Healthy Communities Institute, 2018)

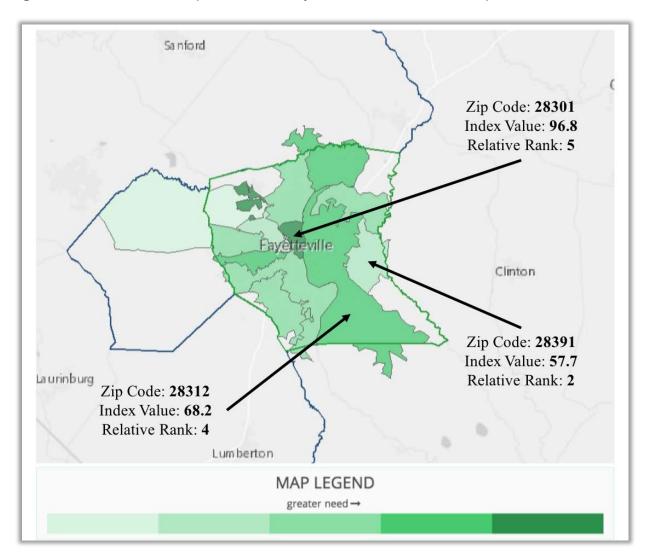

Table 7. SocioNeeds Index® (Conduent Healthy Communities Institute, 2018)

Zip Code	Index Value	Relative Rank
28301	96.8	5
28307	90.8	5
28308	89.3	5
28356	69.3	4
28312	68.2	4
28304	67.9	4
28306	66.2	3
28314	65.8	3

28395	65.3	3
28348	62.9	3
28311	62.8	3
28303	60.8	2
28391	57.7	2
28305	56.4	2
28310	0.1	1

Understanding where there are communities with high socioeconomic need is critical to forming prevention and outreach activities.

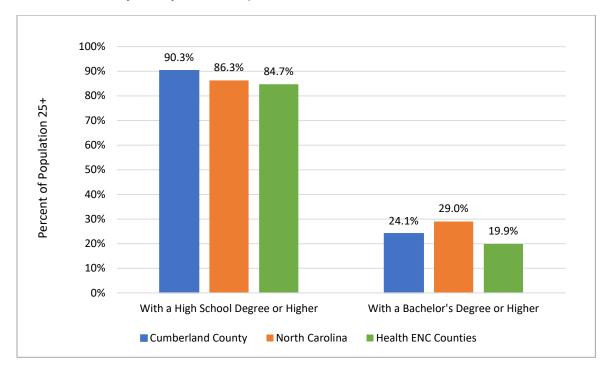

## **Educational Profile**

#### **Educational Attainment**

Graduating from high school is an important personal achievement and is essential for an individual's social and economic advancement. Graduation rates can also be an important indicator of the performance of an educational system. Having a bachelor's degree opens up career opportunities in a variety of fields and is often a prerequisite for higher-paying jobs.

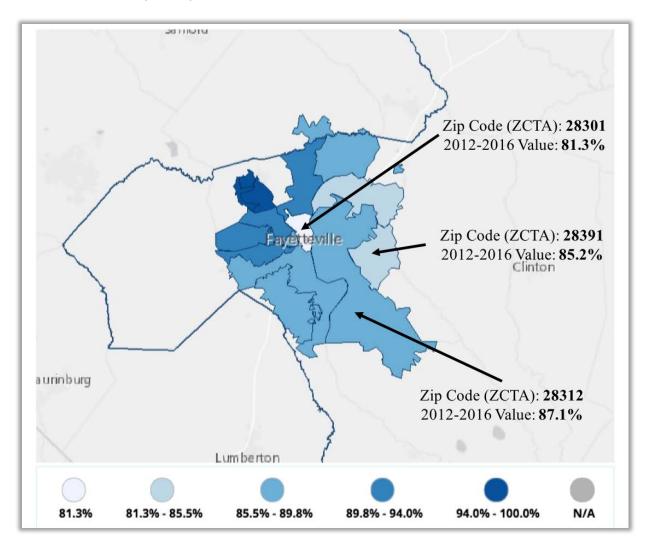

Countywide, the percent of residents 25 or older with a high school degree or higher (90.3%) is higher than the state value (86.3%) and the Health ENC region (84.7%) (Figure 25). Higher educational attainment in Cumberland County is lower than the state value but higher than the Health ENC region. In Cumberland County, 24.1% of residents 25 and older have a bachelor's degree or higher, compared to 29.0% in North Carolina and 19.9% in Health ENC counties (Figure 25).

Figure 26. People 25+ with a High School Degree or Higher and Bachelor's Degree or Higher (American Community Survey, 2012-2016)

Countywide, the high school degree attainment rate varies. For example, zip code 28301, which has a high poverty rate and high socioeconomic need (SocioNeeds Index®), has the lowest high school graduation rate in the county, at 81.3%. (Figure 26).

Figure 27. People 25+ with a High School Degree or Higher by Zip Code (American Community Survey, 2012-2016)

## **High School Dropouts**

High school dropouts earn less income than high school and college graduates, and are more likely to be unemployed. High school dropouts are generally less healthy and require more medical care. Further, high school dropout rates are linked with heightened criminal activity and incarceration rates, influencing a community's economic, social, and civic health.

Cumberland County's high school dropout rate, given as a percent of high school students in Figure 27, is 2.3% in 2016-2017, which is similar to the rate in North Carolina (also 2.3%) and the Health ENC region (2.4%).

3.0% Percent of High School Students 2.6% 2.6% 2.4% 2.3% 2.5% 2.3% 2.4% 2.3% 2.3% 2.0% 2.2% 2.1% 1.5% 1.0% 0.5% 0.0% 2013-2014 2014-2015 2015-2016 2016-2017 Years Health ENC Counties Cumberland County → North Carolina

Figure 28. High School Dropout Rate (North Carolina Department of Public Instruction)

## **High School Suspension Rate**

High school suspension is a form of discipline in which a student is temporarily removed from a classroom and/or school due to a violation of school conduct or code. Higher rates of suspension can be related to high rates of antisocial or delinquent behaviors, which may further contribute to potential future involvement in the juvenile justice system. Additionally, schools with higher suspension rates have higher rates of law or board of education violations and generally spend more money per student.

Cumberland County's rate of high school suspension (26.6 suspensions per 100 students) is higher than North Carolina's rate (18.2) but similar to the rate of Health ENC counties (25.5) in 2016-2017. As shown in Figure 28, the rates for all three geographies are fairly consistent across four time periods, with Cumberland County's values over time higher than those in North Carolina but similar to those in the Health ENC region.

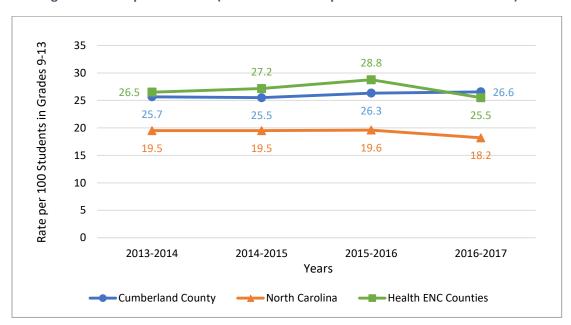

Figure 29. High School Suspension Rate (North Carolina Department of Public Instruction)

Cumberland County approximately has approximately, 52 - grades K – 5 schools, 18 – grades 6-8 schools, and 17 grades 9-12 schools serving approximately 49,641 students (Cumberland County Fiscal Report 2018). There are 203 Day Care Centers and Child Care Service Providers, 30 independent private and religious schools with approximately 4,652 students enrolled (National Center for Education Statistics 2018). There are also three post-secondary institutions and one facility on Fort Bragg. The post-secondary institutions are Fayetteville Technical Community College, Fayetteville State University (off site campus at Fort Bragg and Seymour Johnson Air Force Base), and Methodist University.

## **Environmental Profile**

Air Quality: Overview of Air Quality in Cumberland County

Congress established much of the basic structure of the Clean Air Act in 1970, and made major revisions in 1977 and 1990. Dense, visible smog in many of the nation's cities and industrial centers helped to prompt passage of the 1970 legislation at the height of the national environmental movement. The subsequent revisions were designed to improve its effectiveness and to target newly recognized air pollution problems such as acid rain and damage to the stratospheric ozone layer. <a href="http://www.epa.gov/air/caa/requirements.html">http://www.epa.gov/air/caa/requirements.html</a> Retrieved 11/15/16

The NCDAQ monitors levels of all criteria pollutants in Cumberland County and reports these levels to the EPA. According to the most recent data, Cumberland County is meeting NAAQS for all of the pollutants. Federal enforcement of the ozone NAAQS is based on a 3-year monitor "design value". The design value for each monitor is obtained by averaging the annual fourth highest daily maximum 8-hour ozone values over three consecutive years. If a monitor design value exceeds the NAAQS, that monitor is in violation of the standard. The EPA may designate part or all of the metropolitan statistical area (MSA) as nonattainment even if only one monitor in the MSA violates the NAAQS. There are two ozone monitors in Cumberland County. One of the monitors is located northeast of Fayetteville (Wade) and the other was formerly located in Golfview but switched to a new location southeast of Fayetteville (Honeycutt) in Spring 2015 (March/April). <a href="https://www.fampo.org/airquality">www.fampo.org/airquality</a>

## **Transportation Profile**

Public transportation offers mobility, particularly to people without cars. Transit can help bridge the spatial divide between people and jobs, services, and training opportunities. Public transportation also reduces fuel consumption, minimizes air pollution, and relieves traffic congestion. Walking to work helps protect the environment, while also providing the benefit of daily exercise.

Countywide, 4.0% of residents walk to work, compared to the state value of 1.8% and the regional value of 2.4%. Public transportation is rare in Cumberland County, with an estimated 0.6% of residents commuting by public transportation, compared to the state value of 1.1% and the regional value of 0.4% (Figure 29). In Cumberland County, 82.1% of workers 16 and older drive alone to work, compared to 81.1% in North Carolina and 81.4% in Health ENC counties (Figure 30).

Figure 30. Mode of Commuting to Work (American Community Survey, 2012-2016)

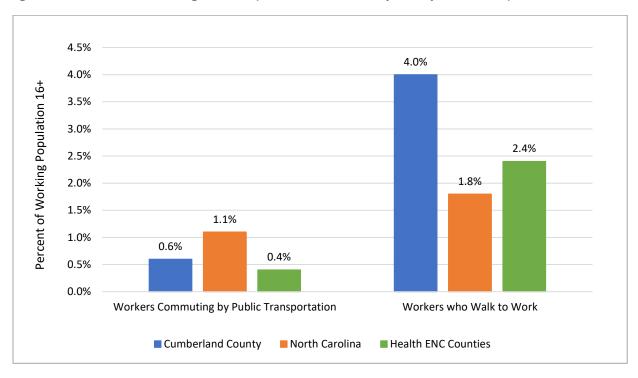

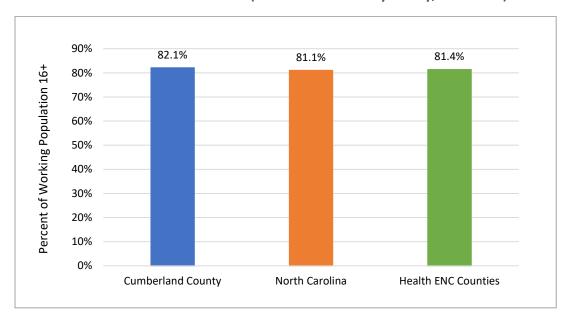

Figure 31. Workers who Drive Alone to Work (American Community Survey, 2012-2016)

## **Local Transportation**

Thousands of Cumberland County residents travel in their own vehicles to various destinations across the city and county. They rely on their own independence to get to work, the doctor's office or even the grocery store. However, some residents try to manage daily with the reality of not having any means of transportation. Many of those without vehicles get from place to place using public transportation. <a href="http://www.co.cumberland.nc.us/planning/ctp.aspx">http://www.co.cumberland.nc.us/planning/ctp.aspx</a> Retrieved 02/16/19

## **Passenger Rail Service**

Fayetteville is served by passenger trains of the Amtrak system with four trains stopping daily in route between New York and Miami. Amtrak's Carolinian Line in Raleigh provides passenger service within North Carolina and on to Richmond and Washington.

#### **FAST**

Fayetteville Area System of Transit (FAST) is the City of Fayetteville's public transportation system. FAST operates a fleet of 27 fixed-route buses on 19 routes to provide service Monday through Friday from 5:30 AM to 10:30 PM, and on Saturday from 7:30 AM to 10:30 PM. In addition, 16 FASTTRAC! Vehicles provide paratransit service to disabled clients that are unable to use the fixed-route system.

FAST began in 1976 when the City of Fayetteville assumed operations from a private transportation system operated by the Cape Fear Transit Bus Company. Cape Fear Transit provided service in Fayetteville, as well as Little Rockfish in Hope Mills. It operated seven days a week, from 5:30 AM to midnight, with a fleet size of 23 buses and 20 bus operators.

Today, the services provided are more efficient, with FAST completing close to 1.6 million passenger trips annually. As a result, citizens of Fayetteville have better access to jobs, medical facilities, shopping and recreation opportunities. FAST provides a critical link to economic development and a better quality of life in Fayetteville. One thing that has not changed is FAST's mission and commitment to providing safe and affordable transportation services to more than 6,000 daily passengers. Source: <a href="https://fayettevillenc.gov/government/city-departments/transit">https://fayettevillenc.gov/government/city-departments/transit</a> retrieved on 02/15/19

# **Crime and Safety**

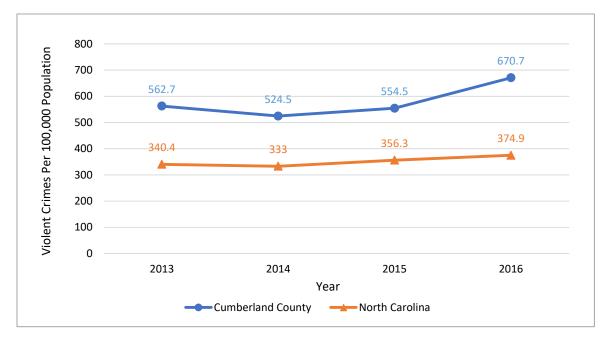

### **Violent Crime and Property Crime**

Both violent crime and property crime are used as indicators of a community's crime and safety. Violence negatively impacts communities by reducing productivity, decreasing property values and disrupting social services. Violent crime includes four offenses: murder and non-negligent manslaughter, rape, robbery, and aggravated assault. Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson.

The violent crime rate in Cumberland County is 670.7 per 100,000 population, compared to 374.9 per 100,000 people in North Carolina (Figure 31). Across four measurement periods, from 2013 to 2016, the

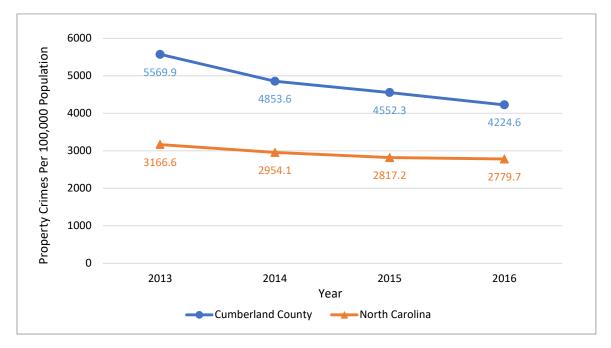

rate of violent crime in Cumberland County is consistently higher than the rate of violent crime in the state.

Figure 32. Violent Crime Rate (North Carolina Department of Justice)

The property crime rate in Cumberland County (4,224.6 per 100,000 people) is higher than the state value (2,779.7 per 100,000 people) (Figure 32). Over the past four measurement periods, the property crime rate has decreased in both the county and state.

Figure 33. Property Crime Rate (North Carolina Department of Justice)

#### **Juvenile Crime**

Youth who commit a crime may not gain the educational credentials necessary to secure employment and succeed later in life. Negative peer influences, history of abuse/neglect, mental health issues, and significant family problems increase the risk of juvenile arrest. The juvenile justice system aims to reduce juvenile delinquency through prevention, intervention, and treatment services.

Figure 33 shows the juvenile undisciplined rate per 1,000 youth ages 6-17 years old. The undisciplined rate describes juveniles who are unlawfully absent from school, regularly disobedient and beyond disciplinary control of the parent/guardian, are regularly found where it is unlawful for juveniles to be, or have run away from home for more than 24 hours. The 2017 juvenile undisciplined rate in Cumberland County (0.7) is lower than the rate in North Carolina (1.5) and the Health ENC region (1.1).

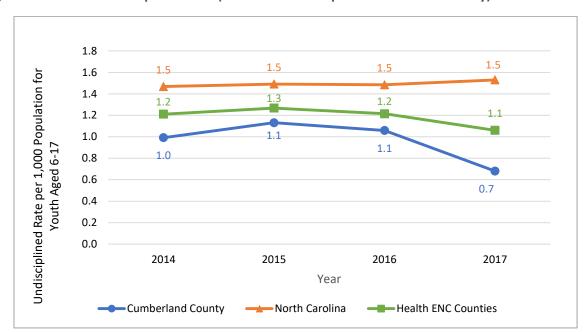

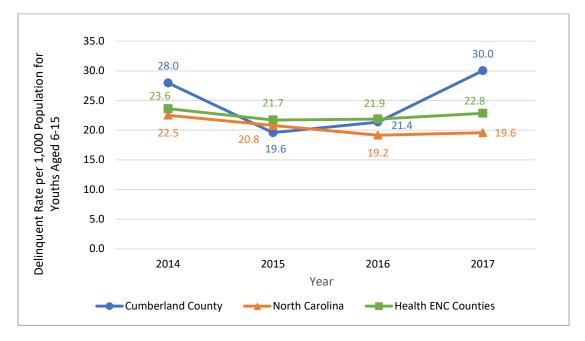

Figure 34. Juvenile Undisciplined Rate (North Carolina Department of Public Safety)

Figure 34 shows the juvenile delinquent rate, or juvenile crime rate, per 1,000 youth ages 6-15 years old. While the juvenile crime rate in Cumberland County decreased from 2014 to 2015, the rate increased over the past three measurement periods. The 2017 juvenile delinquent rate for Cumberland County (30.0) is higher than North Carolina (19.6) and the Health ENC region (22.8).

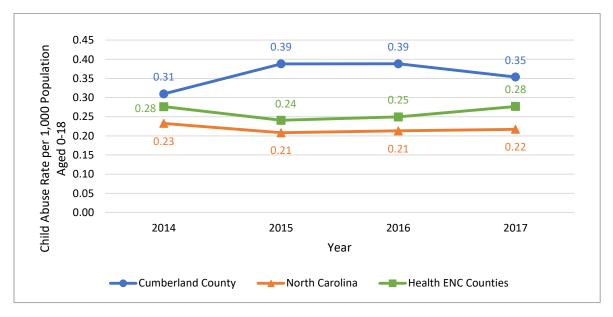

Figure 35. Juvenile Delinquent Rate (North Carolina Department of Public Safety)

#### **Child Abuse**

Child abuse includes physical, sexual and emotional abuse. All types of child abuse and neglect can have long lasting effects throughout life, damaging a child's sense of self, ability to have healthy relationships, and ability to function at home, at work, and at school. Figure 35 shows the child abuse rate per 1,000 population aged 0-18. The child abuse rate in Cumberland County has remained relatively stable over the past three measurement periods, and has consistently remained higher than the state and regional rate. The 2017 child abuse rate in Cumberland County is 0.35 per 1,000 population, compared to 0.22 in North Carolina and 0.28 in the Health ENC region.

Figure 36. Child Abuse Rate (Management Assistance for Child Welfare, Work First, and Food & Nutrition Services in North Carolina & University of North Carolina at Chapel Hill Jordan Institute for Families)

#### **Incarceration**

According to the U.S. Bureau of Justice Statistics, approximately one out of 100 adults in the U.S. are in jail or prison. Conditions in jails and prisons can lead to an increased risk of infectious diseases such as tuberculosis and hepatitis C, as well as assault from other inmates. After incarceration, individuals are likely to face a variety of social issues such as employment discrimination, disruption of family relationships and recidivism.

Figure 36 shows the incarceration rate per 1,000 population. The 2017 incarceration rate in Cumberland County (262.7 per 1,000 population) is lower than North Carolina (276.7) and higher than the Health ENC region (232.6).

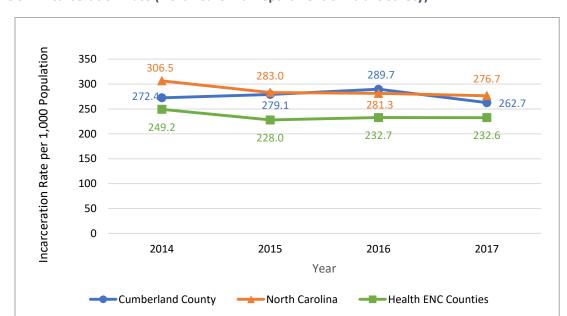

Figure 37. Incarceration Rate (North Carolina Department of Public Safety)

## Access to Healthcare, Insurance and Health Resources Information

#### **Health Insurance**

Medical costs in the United States are very high. People without health insurance may not be able to afford medical treatment or prescription drugs. They are also less likely to get routine checkups and screenings, so if they do become ill they may not seek treatment until the condition is more advanced, and therefore more difficult and costly to treat.

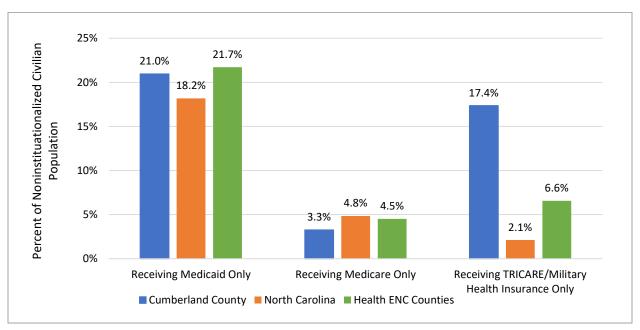

Figure 37 shows the percent of people aged 0-64 years old that have any type of health insurance coverage. The rate for Cumberland County, 89.2%, is higher than the rate for North Carolina (87.8%) and the Health ENC region (87.2%). Countywide, 10.8% of the population is uninsured, compared to 12.2% in North Carolina and 12.8% in the Health ENC region.

100% 89.2% 87.8% 87.2% 90% 80% 70% Percent of Population 0-64 60% 50% 40% 30% 20% 10% 0% **Cumberland County** North Carolina **Health ENC Counties** 

Figure 38. Persons with Health Insurance (Small Area Health Insurance Estimates, 2016)

Figure 38 shows the percent of the population only receiving health insurance through Medicaid, Medicare, or military healthcare (TRICARE). Cumberland County has a higher percent of people receiving Medicaid (21.0%) than North Carolina (18.2%), but a lower percent of people receiving Medicaid than Health ENC counties (21.7%). The percent of people receiving Medicare is lower in Cumberland County (3.3%) when compared to North Carolina (4.8%) and Health ENC counties (4.5%). The percent of people receiving military health insurance, however, is noticeably higher in Cumberland County (17.4%) than in North Carolina (2.1%) and Health ENC counties (6.6%).

Figure 39. Persons Only Receiving Health Insurance through Medicaid, Medicare or Military Healthcare (American Community Survey, 2012-2016)

In Cumberland County, 10.8 % are uninsured that is lower than the state uninsured rate of 12.2% (U.S. Census Bureau 2018). In Cumberland County, there are two tribal communities- Coharie and the Lumbee (American Census Survey 2018). In figures 40 and 41 demonstrates the 6.7 % Coharie and 7.6% Lumbee tribal communities have no health insurance compared to the 11.2% civilian non-institutionalized who also have no health insurance coverage (U.S. Census Bureau, 2018). Similarly civilians non-institutionalized with health insurance coverage are very close in rate. Tribal communities such as the Coharie has 85.1% and Lumbee has 86.8 % and Cumberland County civilians non-institutionalized have health insurance coverage of 88.8%. There is a slight disparity where tribal communities have only 57.7% of the Coharie and 57.8 % of the Lumbee have private insurance among and 65.5% of Cumberland County has private health insurance (U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates 2018). The public insurance coverage is great within the tribal communities – 48.6% Coharie and 47.8 % Lumbee and only 23.3% of Cumberland County civilians non-institutionalized (American Census Survey 2018).

## **Civic Activity**

## **Political Activity**

Exercising the right to vote allows a community to choose elected officials and hold them accountable. Voting ensures that all citizens have the opportunity to voice their opinions on issues such as the use of tax dollars, civil rights and foreign policy. By voting, individuals shape their communities and influence the next generation of society. A high level of voter turnout indicates that citizens are involved and interested in who represents them in the political system.

Figure 39 shows the voting age population, or percent of the population aged 18 years and older. Cumberland County has a lower percent of residents of voting age (74.6%) than North Carolina (77.3%) and Health ENC counties (76.7%).

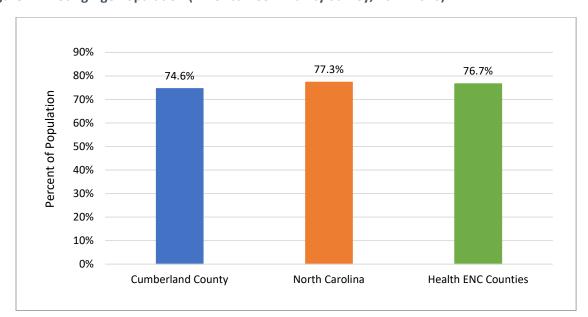

Figure 42. Voting Age Population (American Community Survey, 2012-2016)

Figure 40 shows the percent of registered voters who voted in the last presidential election. The rate in Cumberland County was 58.5%, which is lower than the state value (67.7%) and regional value (64.3%).

## Civic Activity Data

#### County Structure

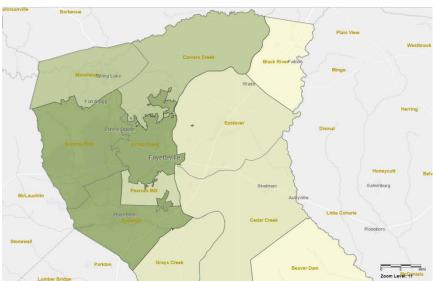

Cumberland County is located in the southeastern region of the North Carolina and is bordered by Sampson, Bladen, Robeson, Hoke, Harnett and Moore counties. The present land area is 658.37 square miles, with appropriately 489.7 people per square mile of land area (US Census Bureau 2018). Cumberland County was named in honor of William Augustus, Duke of Cumberland, and third son of King George II. Duke of Cumberland was the commander of the English Army at the Battle of Culloden, wherein the Scotch Highlanders were defeated, in 1746. As settlers came to North America, and their principal settlement was in Cumberland County, North Carolina. Cumberland County was became the official name after late 1784. Cumberland County was formerly known as Fayette County in early 1784, however the name was repealed during the November 1784 General Assembly.

The county seat was first called Cumberland Court House. In 1762, Campbellton was established at Cross Creek with provisions for the public buildings. In 1778, Cross Creek and Campbellton were joined and the courthouse was ordered to be erected in that part of the town known as Cross Creek. In 1783, Campbellton was changed to Fayetteville in honor of Lafayette. Currently, Fayetteville is the County's seat and its largest municipality. Other municipalities in Cumberland County are Eastover, Falcon, Godwin, Hope Mills, Linden, Spring Lake, Stedman and Wade. There are ten major subdivisions of within Cumberland County- Carvers Creek, Black River, Eastover, Seventy-First, Pearces Mill, Rockfish, Grays Creek, Cedar Creek, Cross Creek, Beaver Damand Fort Bragg.

Figure 45- Cumberland County with subdivisions (American Census Bureau 2010)

Fort Bragg is one of the U.S. Army's largest installations in the world and recently celebrated, on September 4, 2018, with over 100 years as an active home for Airborne and Special Operation Forces.

The installation covers about 161,000 acres, or 251 square miles, stretching into six counties. Fort Bragg underwent significant change in the 1990s. From the removal of wooden barracks to building construction/renovation through expansion of training areas into the newly purchased Overhills site, Fort Bragg greeted the new century with a fresh appearance.

Since 2000, Fort Bragg Soldiers have participated in combat and humanitarian operations in countries around the world. Fort Bragg responded to provide support to those impacted by Hurricane Katrina in 2005 and in Haiti after the 2010 earthquake. Fort Bragg serves a vital role in the war on terror, deploying and supporting more troops than any other post, in support of Operations Enduring Freedom, Iraqi Freedom and New Dawn. Fort Bragg continues to invest to modernize and expand facilities. The 82nd Airborne Division's 1955 barracks complex was replaced with modern buildings. Office buildings and barracks have also been constructed for units recently added to the division. A new headquarters building was constructed on Knox and Randolph Streets for the U.S. Army Forces Command (FORSCOM) and the U.S. Army Reserve Command.

These two major commands moved to Fort Bragg in 2011 when Fort Macpherson, Georgia, was closed under the Base Realignment and Closure (BRAC) legislation. BRAC moves also resulted in the 7th Special Forces Group completing their relocation from Fort Bragg to Eglin Air Force Base, Florida. Today Fort Bragg, "the Home of the Airborne and Special Operations," with approximately 57,000 military personnel, 11,000 civilian employees and 23,000 family members is one of the largest military complexes in the world.

#### Cumberland County Governance

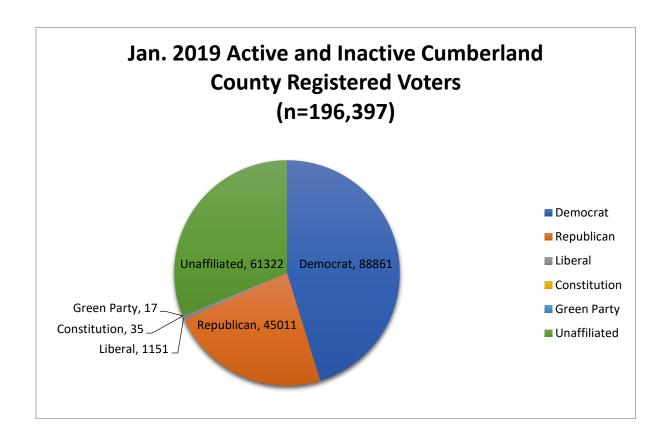

The County of Cumberland governance functions under the form of a Board of Commissioners – County Manager. Cumberland County Board of Commissioners consists of seven members. The Board of Commissioners serves as the governing board for the County. Its purpose is to maintain fiscal responsibility while providing mandated services as set out in the General Statutes and additional services as passed on to the County by State and Federal governments. It is also responsible for other services deemed appropriate and necessary by the Board.

The County of Cumberland operates under a Board of Commissioners - County Manager form of government. The Board of Commissioners consists of seven members, two elected from District One, which largely follows the 42nd and 43rd House district lines and encompasses a small part of House district 44; three members elected from District Two, which follows the 22nd, 44th and 45th House district lines; and two members elected at-large.

Each member is elected to a four-year term. The terms are staggered, and the members elect their own Chairman and Vice Chairman annually. The Board of Commissioners meet two times each month, the first Monday of the month at 9 AM and the third Monday of the month at 6:45 PM. The meetings are held in the County Commissioners' meeting room (Room 118), on the first floor of the County Courthouse located at 117 Dick Street, Fayetteville, North Carolina. The meetings are open to the public. In addition, the meetings are broadcast live on Fayetteville/Cumberland Educational TV (FCETV), Spectrum Channel 5. The meetings are rebroadcast the following Tuesday at 7:30 p.m.

#### Political Activity

In Cumberland County there are 196,397 citizens registered to vote. Approximately 45% affiliate with Democrat Party, 23% affiliate with Republican Party, less than 1 % affiliate with Green Party and the Constitution Parties, and 31% unaffiliated with any party.

# **Findings**

## **Secondary Data Scoring Results**

Table 8 shows the data scoring results for Cumberland County by topic area. Topics with higher scores indicate greater need. Immunizations & Infectious Diseases is the poorest performing health topic for Cumberland County, followed by Other Chronic Diseases, Respiratory Diseases, Public Safety and Environmental & Occupational Health.

**Table 8. Secondary Data Scoring Results by Topic Area** 

Health and Quality of Life Topics	Score
Immunizations & Infectious Diseases	2.10
Other Chronic Diseases	2.07
Respiratory Diseases	2.04
Public Safety	2.02
Environmental & Occupational Health	2.01

<sup>\*</sup>See Appendix B for additional details on the indicators within each topic area

# **Primary Data**

#### **Community Survey**

Figure 41 shows the list of community issues that were ranked by residents as most affecting the quality of life in Cumberland County. Low Income/poverty was the most frequently selected issue and was ranked by 27.8% of survey respondents, followed by drugs/substance abuse.

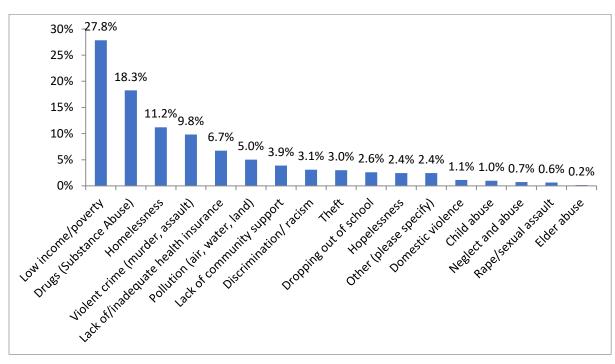

Figure 46. Top Quality of Life Issues, as Ranked by Survey Respondents

Figure 42 displays the level of agreement among Cumberland County residents in response to nine statements about their community. More than half of survey respondents agreed or strongly agreed that the county has good healthcare, is a good place to raise children, has good parks and recreation facilities and is an easy place to buy healthy foods. 40% of survey respondents either disagreed or strongly disagreed that there is plenty of economic opportunity in the county.

Figure 47. Level of Agreement Among Cumberland County Residents in Response to Nine Statements about their Community

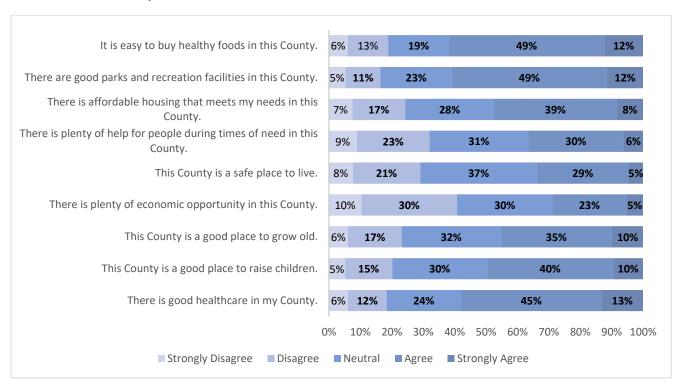

Figure 43 shows the list of services that were ranked by residents as needing the most improvement in Cumberland County. Higher paying employment was the most frequently selected issue, followed by more affordable health services, positive teen activities and counseling / mental health / support groups.

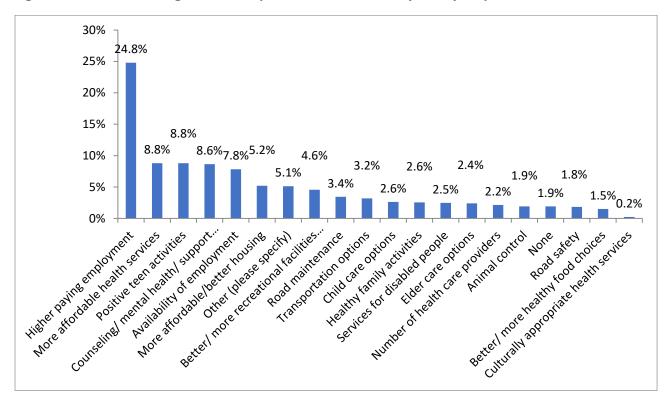

Figure 48. Services Needing the Most Improvement, as Ranked by Survey Respondents

Figure 44 shows a list of health behaviors that were ranked by residents as topics that Cumberland County residents need more information about. Substance abuse prevention was the most frequently selected issue, being ranked by 18.3% of survey respondents. This was followed by other, eating well/nutrition and going to the doctor for yearly check-ups and screenings.

Figure 49. Health Behaviors that Residents Need More Information About, As Ranked by Survey Respondents

#### **Focus Group Discussions**

Table 9 shows the focus group results for Cumberland County by topic area or code. Focus Group transcript text were analyzed by the Conduent HCI team using a list of codes that closely mirror the health and quality of life topics used in the data scoring and community survey processes. Text was grouped by coded excerpts, or quotes, and quantified to identify areas of the highest need per the focus group participants. All excerpts/quotes were also categorized as a strength or a barrier/need based on the context in which the participant mentioned the topic. Topics with higher frequency and mentioned in the context of needs/concerns or barriers/challenges suggests greater need in the community. Topics with a frequency more than 20 are included in the overall list of significant health needs.

**Table 9. Focus Group Results by Topic Area** 

Topic Area (Code)	Frequency
Exercise, Nutrition & Weight	37
Access to Health Services	23
Older Adults & Aging	19
Occupational & Environmental Health	16
Low-Income/Underserved	10
Diabetes	9
Environment	9
Transportation	9

# **Data Synthesis**

All forms of data have strengths and limitations. In order to gain a comprehensive understanding of the significant health needs for Cumberland County, findings from the secondary data, community survey and focus group discussions were compared and analyzed for areas of overlap. The top needs from each data source were identified using the criteria displayed in Table 10.

Table 10. Criteria for Identifying the Top Needs from each Data Source

Data Source	Criteria for Top Need			
Secondary Data	Topics receiving highest data score			
Community Survey	Community issues ranked by survey respondents as most affecting the quality of life*			
Focus Group Discussions	Topics discussed most frequently by participants in context of needs/concerns or barriers/challenges to achieving health			

<sup>\*</sup>Community Survey Q4: Please look at this list of community issues. In your opinion, which one issue most affects the quality of life in this County?

The top needs from each data source were incorporated into a Venn Diagram. Community issues ranked by survey respondents were categorized to align with the health and quality of life topic areas displayed in Table 2.

Figure 45 displays the top needs from each data source in the Venn diagram.

**Secondary Data Immunizations & Infectious Diseases** Other Chronic Respiratory Diseases Diseases Occupational & **Public Safety Environmental** Community **Focus** Health Survey Groups **Exercise, Nutrition Economy** & Weight **Substance Abuse** Access to **Health Services** 

Figure 50. Data Synthesis

Across all three data sources, there is strong evidence of need for Occupational & Environmental Health and Public Safety. As seen in Figure 45, the survey results and focus group discussion analysis cultivated additional topics not ranked as top priorities in the secondary data findings. A mixed-methods approach is a strength when assessing a community as a whole. This process ensures robust findings through statistical analysis of health indicators and examination of constituent's perceptions of community health issues.

#### **Topic Areas Examined in This Report**

The five topic areas with the highest secondary data scores are explored in-depth in this report.

Table 11. Topic Areas Examined In-Depth in this Report

Access to Health Services

Economy

Exercise, Nutrition & Weight

Immunizations & Infectious Diseases\*

# Occupational & Environmental Health\* Other Chronic Diseases\* Public Safety\* Respiratory Diseases\* Substance Abuse

The five topic areas with the highest secondary data scores (starred\*) are explored in-depth in the next section and include corresponding data from community participants when available. Following the five topic areas is a section called 'Other Significant Health Needs' which includes discussion of the additional topics that were identified specifically in the community survey and focus group discussions. The additional topics in 'Other Significant Health Needs' includes Access to Health Services, Economy, Exercise, Nutrition & Weight and Substance Abuse.

#### **Navigation Within Each Topic**

Findings are organized by topic area. Within each topic, key issues are summarized followed by a review of secondary and primary data findings. Special emphasis is placed on populations that are highly impacted, such as older adults, race/ethnic groups or low-income populations. Figures, tables and extracts from quantitative and qualitative data substantiate findings. Each topic includes a table with key indicators from the secondary data scoring results. The value for Cumberland County is displayed alongside relevant comparisons, gauges and icons which are color-coded with green indicating good, red indicating bad and blue indicating neutral. Table 12 describes the gauges and icons used to evaluate the secondary data.

Table 12. Description of Gauges and Icons used in Secondary Dara Scoring

Gauge or Icon	Description					
<b>6</b>	Green represents the "best" 50th percentile.					
	Yellow represents the 50th to 25th quartile					
	Red represents the "worst" quartile.					
	There has been a non-significant increase/decrease over time.					
	There has been a significant increase/decrease over time.					
	There has been neither a statistically significant increase nor decrease over time.					

#### **Immunizations & Infectious Diseases**

#### **Key Issues**

- The syphilis incidence rate is a top health concerning Cumberland County and is higher than in North Carolina and the U.S. with 15.4 cases per 100,000 population
- The age-adjusted death rate due to influenza and pneumonia is significantly increasing over time and does not meet the Healthy North Carolina 2020 goal of 13.5 deaths per 100,000 population
- The HIV diagnoses rate is higher in Cumberland County than in North Carolina and does not meet the Healthy North Carolina 2020 goal of 22.2 cases per 100,000 population
- Chlamydia and Gonorrhea is higher in Cumberland County than in the state and U.S.

#### **Secondary Data**

Immunizations & Infectious Diseases has the highest data score of all topic areas, with a score of 2.10. Table 14 highlights indicators of concern with the highest indicator scores.

**Table 13. Data Scoring Results Immunizations & Infectious Diseases** 

Score	Indicator (Year) (Units)	Cumberland County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.5	Syphilis Incidence Rate (2016) (cases/ 100,000 population)	15.4	10.8	8.7	<b>(</b> )		<b>_</b>		_
2.48	Age-Adjusted Death Rate due to Influenza and Pneumonia (2012-2016) (deaths/ 100,000 population)	20.9	17.8	14.8			<b>1</b>	13.5	_
2.2	HIV Diagnosis Rate (2014-2016) (cases/ 100,000 population) Chlamydia	28.1	16.1	-				22.2	-

\*See Appendix B for full list of indicators included in each topic area

#### **Primary Data**

7.8% of community survey participants felt that the community needs more information about going to the doctor for yearly check-ups and screenings. Less than 1% identified getting flu shots and other vaccines was something the community needed more information about. 4.6% respondents felt that preventing pregnancy and sexually transmitted disease (safe sex) was a health behavior that the community needs more information about. 56.5% of survey participants reported that they had received a flu shot. Immunizations & Infectious Diseases was not discussed during the focus group discussions.

#### **Highly Impacted Populations**

Data scoring analysis did not identify, or there was not data available, to indicate any groups highly impacted within the Immunizations & Infectious Diseases topic area indicators. No specific groups were identified in the primary data sources.

#### **Other Chronic Diseases**

#### **Key Issues**

- Chronic kidney disease amongst the Medicare population is higher than in North Carolina and the U.S. and is significantly increasing over time
- Rheumatoid arthritis or osteoarthritis amongst the Medicare population is higher than in North Carolina and the U.S. and is significantly increasing over time

#### **Secondary Data**

The secondary data scoring results reveal Other Chronic Diseases as a top need in Cumberland County with a score of 2.07. Additional analysis is performed to find specific indicators that contribute to this area of concern, and these indicators are identified with high indicator data scores, shown in Table 13.

**Table 14. Data Scoring Results for Other Chronic Diseases** 

Score	Indicator (Year) (Units)	Cumberland County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend
2.7	Chronic Kidney Disease: Medicare Population (2015) (percent)	22.4	19	18.1			<b>&gt;</b>
2.7	Rheumatoid Arthritis or Osteoarthritis: Medicare Population (2015) (percent)	33.8	29.1	30	A		<b>1</b>

<sup>\*</sup>See Appendix B for full list of indicators included in each topic area

#### **Primary Data**

8.3% of survey respondents reported that a medical provider had diagnosed them with Osteoporosis. Community participants did not view the following services as needing the most improvement: Elder Care options (2.4%) or services for disabled people (2.5%). There were a few survey participants that selected Caring for family members with special needs/disabilities (4.9%) and elder care (3.3%) as healthy behaviors that the community needs more information.

The focus groups raise the topic of other chronic disease three times during the discussions. One participant felt that asthma and respiratory issues in general are a top health concern in the community. Two participants specifically referenced arthritis as an issue in the community and specifically for elderly farmers.

#### **Highly Impacted Populations**

Data scoring analysis did not identify, or there was not data available, to indicate any groups highly impacted within the Other Chronic Diseases topic area indicators. The focus groups raised elderly farmers as a potential vulnerable group within this topic area

# **Respiratory Diseases**

#### **Key Issues**

- Asthma amongst the Medicare population is a top health concern for Cumberland County and is significantly increasing over time
- The age-adjusted death rate due to influenza and pneumonia does not meet the Healthy North Carolina 2020 goal of 13.5 deaths per 100,000 population
- COPD amongst the Medicare population is significantly increasing over time
- The age-adjusted hospitalization rate due to asthma is 164.4 hospitalizations per 10,000 population

#### **Secondary Data**

Respiratory Diseases was the 4<sup>th</sup> highest scoring topic area and received a data score of 2.04. Poorly performing indicators related to the Respiratory Diseases are displayed in Table 15.

**Table 15. Data Scoring Results for Respiratory Diseases** 

Score	Indicator (Year) (Units)	Cumberland County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.55	Asthma: Medicare Population (2015) (percent)	9.4	8.4	8.2			1		-
2.48	Age-Adjusted Death Rate due to Influenza and Pneumonia (2012-2016) (deaths/ 100,000 population)	20.9	17.8	14.8			1	13.5	-
2.4	COPD: Medicare Population (2015) (percent)	13.5	11.9	11.2			1		-
2.05	Age-Adjusted Hospitalization Rate due to Asthma (2014) (hospitalizations/ 10,000 population)	162.4	90.9	-			1	<del>-</del>	-

<sup>\*</sup>See Appendix B for full list of indicators included in each topic area

#### **Primary Data**

19.6% of survey participants have been told by a health professional that they have asthma. When asked what health behavior community survey participants needed more information about, 2.7% selected quitting smoking/tobacco use prevention.

14.5% of survey participants reported currently use tobacco products. Of those who reported tobacco product use, 31% would go to a doctor if they wanted to quit, 21.8% stated that they did not want to quit and 21.8% didn't know where they would go. 48.4% of survey participants reported having been exposed to secondhand smoke in the last year. Of those who indicated that they had been exposed to secondhand smoke, 39.1% were exposed in the home and 27.3% selected 'other', mostly adding that they had been exposed in other people's homes or outside. Most participants (75%) reported that in the past 30 days, there were zero times where they drank more than 4/5 drinks on a single occasion and 8.9% had one time. Reported illicit drug use amongst survey participants in the past 30-days was low, 97.6% reported no illegal drug use and 98.5% reported no use of prescription drugs they did not have a prescription for. Of those who reported any illegal drug use (<3%) in the past 30 days, 85.2% reported marijuana use. Two participants raised Respiratory Diseases as a top health issue in the community. One person shared that their respiratory diseases were a result of smoking for 47 years.

#### **Highly Impacted Populations**

Data scoring analysis did not identify, or there was not data available, to indicate any groups highly impacted within the Respiratory Diseases topic area indicators.

## **Occupational & Environmental Health**

#### **Key Issues**

- Asthma amongst the Medicare population is higher than North Carolina and the U.S. and is significantly increasing over time
- The age-adjusted hospitalization rate due to asthma is 162.4 hospitalizations per 10,000 population

#### **Secondary Data**

Occupational & Environmental Health has the 5<sup>th</sup> highest data score of all topic areas, with a score of 2.01. Indicators of concern with the highest score are displayed in Table 16.

Table 16. Data Scoring Results for Occupational & Environmental Health

Score	Indicator (Year) (Units)	Cumberland County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	
2.55	Asthma: Medicare Population (2015) (percent)	9.4	8.4	8.2			<b>1</b>	
2.05	Age-Adjusted Hospitalization Rate due to Asthma (2014) (hospitalizations/ 10,000 population)	162.4	90.9	-			<b>1</b>	

<sup>\*</sup>See Appendix B for full list of indicators included in each topic area

#### **Primary Data**

Pollution was the sixth highest ranking issue affecting quality of life in the community, with 5% of participants selecting this topic. Environmental health was referenced in the Focus Group discussions seventeen time. Participants expressed concerns with the exposure to byproducts from local industry. In particular, health effects from exposure to chemicals from spraying on crops and run off into the water supply were the primary concerns within the community. Participants were also concerned about mosquitoes in the community.

#### **Highly Impacted Populations**

Data scoring analysis did not identify, or there was not data available, to indicate any groups highly impacted within the Occupational & Environmental Health topic area indicators. No specific groups were identified in the primary data sources.

## **Public Safety**

#### **Key Issues**

- The age-adjusted death rate due to homicide is 11.3 deaths per 100,000 population and does not meet Healthy North Carolina 2020 or Healthy People 2020 goals
- The violent crime rate is 670.7 crimes per 100,000 population which is higher than the rate in the state and U.S.
- The age-adjusted death rate due to firearms is higher than in North Carolina and the U.S., however time trend analysis shows that this indicator is significantly decreasing over time

#### **Secondary Data**

From the secondary data scoring results, Public Safety was identified to be a top need in Cumberland County. It had the 4<sup>th</sup> highest data score of all topic areas, with a score of 2.02. Specific indicators of concern are highlighted in Table 17.

Table 17. Data Scoring Results for Public Safety

Score	Indicator (Year) (Units)	Cumberland County	North Carolina	U.S.	North Carolina Counties	U.S. Counties	Trend	Healthy NC 2020	HP 2020
2.58	Age-Adjusted Death Rate due to Homicide (2012-2016) (deaths/ 100,000 population)	11.3	6.2	5.5				6.7	5.5
2.28	Violent Crime Rate (2016) (crimes/ 100,000 population)	670.7	374.9	386.3			<b>_</b>	-	-
2.25	Age-Adjusted Death Rate due to Firearms (2014-2016) (deaths/ 100,000 population)	17.7	12.7	11			<b>\</b>		9.3

<sup>\*</sup>See Appendix B for full list of indicators included in each topic area

#### **Primary Data**

According to survey results, Prevention & Safety ranked fourth in quality of life topics individuals in Cumberland County felt effected their lives. Specifically, 9.8% felt that violent crime was a top issue in the community. 3% selected theft and <1% selected rape/sexual assault as top issues in the community.

As stated previously, 29% strongly agreed or agreed that Cumberland County is a safe place to live and 20% strongly agreed or agreed that Cumberland County is a good place to raise children. Focus group discussion did not focus on Public Safety in depth but a few participants brought up related issues of concern in the community. A couple participants felt that there is a lack of sidewalks in the community. One participant was concerned about crime in general and that they sometimes can hear gunshots at night.

#### **Highly Impacted Populations**

Data scoring analysis did not identify, or there was not data available, to indicate any groups highly impacted within the Public Safety topic area. No specific groups were identified in the primary data sources

# **Mortality**

Knowledge about the leading causes of death in a population is critical to understanding how to target interventions to maximize population health. Table 18 shows the leading causes of mortality in Cumberland County, North Carolina, and Health ENC Counties in 2014-2016, where the rate is ageadjusted to the 2000 U.S. standard population and is given as an age-adjusted death rate per 100,000 population.

Table 18. Leading Causes of Mortality (2014-2016, CDC WONDER)

	Cumberland County			North (	Carolina		Health ENC Counties			
Ran k	Cause	Death s	Rate*	Cause	Death s	Rate *	Cause	Death s	Rate *	
1	Heart Diseases	1611	188.2	Cancer	58,187	165.1	Cancer	12,593	177.5	
2	Cancer	1605	179.1	Heart Diseases	54,332	159	Heart Diseases	12,171	178.8	
3	Accidental Injuries	441	46.7	Chronic Lower Respiratory Diseases	15,555	45.1	Cerebrovascula r Diseases	3,247	48.5	
4	Chronic Lower Respiratory Diseases	412	49.9	Accidental Injuries	15,024	48.2	Accidental Injuries	3,136	50.1	
5	Cerebrovascula r Diseases	347	42.4	Cerebrovascula r Diseases	14,675	43.6	Chronic Lower Respiratory Diseases	3,098	44.9

\*Age-adjusted death rate per 100,000 population

# **Other Significant Health Needs**

#### **Access to Health Services**

#### **Secondary Data**

From the secondary data scoring results, Access to Health Services was the 26<sup>th</sup> most pressing health need in Cumberland County with a score of 0.98. Top related indicators include: Adults with Health Insurance (1.63).

#### **Primary Data**

As previously summarized, the majority of community survey respondents have health insurance through an employer (63.9%) followed by the military/Tricare/VA (16.7%). Participants were asked where they most often go to seek medical treatment, the majority sought care at a doctor's office 69.6%. The majority of participants did not report any problems getting the health care they needed in the past 12 months (83.1%). For those who reported have difficulties accessing health care services, the most common reported providers that they had trouble getting services from were a general practitioner (34.8%) dentist (29.9%), general practitioner (29%) and a specialist (27.9%). The top reasons participants reported not being able to get the necessary health care they needed were insurance didn't cover what they needed (36.9% and having no health insurance (33.9%). 94.4% of participants reported being able to see the medical provider they needed within Cumberland County.

"My neighbor doesn't have health insurance and she had an obvious problem with her feet swelling really, really large and I told her she needed to get to the doctor and she said she was waiting for a free health day in {town}. She doesn't have insurance."

Focus Group participants discussed financial barriers to accessing health services specifically with being able to afford co-pays and medications and especially for those who do not have health insurance. One participant felt that there should be more programs and services for mental health. Participants were particularly concerned for senior citizens being underinsured, veterans with limited health care options and young adults who do not have health insurance. Many people felt that there is some help for those who are low income but that more could be done such as adding urgent care and safety net clinics.

# **Economy**

#### **Secondary Data**

From the secondary data scoring results, Economy was the 13<sup>th</sup> most pressing health need in Cumberland County with a score of 1.87. Top related indicators include: Homeownership (2.70), Students Eligible for the Free Lunch Program (2.55), Food Insecurity Rate (2.30), People Living Below Poverty Level (2.25), Total Employment Change (2.25), Families Living Below Poverty Level (2.20) and Population 16+ in Civilian Labor Force (2.20).

#### **Primary Data**

Community survey participants were asked to rank the issues most negatively impacting their community's quality of life. According to the data, both poverty and the economy were the top issues in Cumberland County that negatively impact quality of life. Community survey participants were also asked to weigh-in on areas of community services that needed the most improvement. With the highest share of responses, higher paying employment (24.8%) and more affordable health services (8.8%).

Focus group participants also touched on key economic stressors: challenges with being able to afford healthy foods or activities and delays in seeking health care due to costs. Multiple participants brought up issues related to low wages and limited options for jobs. Other participants were concerned about employers not offering health insurance in the community.

## **Exercise, Nutrition & Weight**

#### **Secondary Data**

From the secondary data scoring results, Exercise, Nutrition & Weight was the 16<sup>th</sup> most pressing health need in Cumberland County with a score of 1.67. Top related indicators include: Adults 20+ who are Obese (2.45), Food Insecurity Rate (2.30) and Food Environment Index (2.15).

#### **Primary Data**

Among community survey respondents, 43.3% rated their health is good and 29% rated their health as very good. However, 53% of respondents reported being told by a health professional that they were overweight and/or obese. Additionally, data from the community survey participants show that 40.1% of community members do not engage in any physical activity or exercise during the week that lasts at least 30 minutes. Among individuals that do not exercise, respondents reported being too tired to exercise (and not having enough time as the top reasons for not doing so. For those individuals that do exercise, 58.5% reported exercising or engaging in physical activity at home while 29.2% do so at a private gym.

"You just walk out your door and there are fast food places, The thing is a new restaurant comes in and it's a fast food place. When I first moved here I remember driving down {road name} and I was shocked. I have never seen that many on one place."

Exercise, Nutrition & Weight was discussed in all focus groups. Participants shared their concerns for obesity and lack of exercise amongst both young people and adults in the community. Participants shared concerns with young children staying active. Suggestions included providing more services or activities to help families stay physically active in the community. They shared that they struggled with not knowing how to eat healthy or what to select as healthy food choices when eating away from home. Many participants were concerned with the number of fast food options and limited healthy choices for eating out. To emphasize this point, when community members were asked about specific topic areas they were interested in learning more about in the community survey, managing weight and nutrition/exercise were high frequency responses.

#### **Substance Abuse**

#### **Secondary Data**

From the secondary data scoring results, Substance Abuse was the 23<sup>rd</sup> most pressing health need in Cumberland County with a score of 1.42. Top related indicators include: Alcohol-Impaired Driving Deaths (1.85) and Adults who Smoke (1.85).

#### **Primary Data**

Community survey participants ranked substance abuse (18.3%) as a top issue affecting quality of life in Cumberland County. Additionally, 18.3% of community survey respondents reported wanting to learn more about substance abuse prevention.

14.5% of survey participants reported currently use tobacco products. Of those who reported tobacco product use, 31% would go to a doctor if they wanted to quit, 21.8% stated that they did not want to quit and 21.8% didn't know where they would go. 48.4% of survey participants reported having been exposed to secondhand smoke in the last year. Of those who indicated that they had been exposed to secondhand smoke, 39.1% were exposed in the home and 27.3% selected 'other', mostly adding that they had been exposed in other people's homes or outside. Most participants (75%) reported that in the past 30 days, there were zero times where they drank more than 4/5 drinks on a single occasion and 8.9% had one time. Reported illicit drug use amongst survey participants in the past 30-days was low, 97.6% reported no illegal drug use and 98.5% reported no use of prescription drugs they did not have a prescription for. Of those who reported any illegal drug use (<3%) in the past 30 days, 85.2% reported marijuana use.

Focus group discussion did not focus heavily on substance abuse, however, substance use was mentioned three times as an issue participant see as a problem that needs to be addressed in the community. Participants specifically raised opiates, heroin and alcohol abuse as issues in the community.

"I have to throw in there drug use. I work in the detox unit and not it's just young people, there are people in their 40's, 50's, 60's, and 70's are having addiction problems. We get a call all the time, is there a bed ready, that's a big problem. I thought it was just the big cities, but we have a problem in Cumberland County. Its opiates, heroin, alcohol."

# A Closer Look at Highly Impacted Populations

Several subpopulations emerged from the primary and secondary data for their disparities in access to care, risk factors, and health outcomes. This section focuses on these subpopulations and their unique needs.

## Disparities by Age, Gender and Race/Ethnicity

Secondary data are further assessed to determine health disparities for race/ethnic, age, or gender groups. Table 19 identifies indicators in which a specific population subgroup differs significantly and negatively from the overall population in Cumberland County, with significance determined by non-overlapping confidence intervals.

Table 19. Indicators with Significant Race/Ethnic, Age, or Gender Disparities

Health Indicator	Group(s) Disparately Affected*
Prostate Cancer Incidence Rate	Black
Age-Adjusted Death Rate due to Firearms	Male
People Living Below Poverty Level	12-17, 18-24, 6-11, <6, Female, Black or African American
Families Living Below Poverty Level	American Indian or Alaska Native, Black or African American
Children Living Below Poverty Level	Black or African American
Young Children Living Below Poverty Level	Black or African American
Per Capita Income	American Indian or Alaska Native, Black or African American, Hispanic or Latino, Other, Two or More Races
Median Household Income	Black or African American, Hispanic or Latino, Other
Workers Commuting by Public Transportation	White, non-Hispanic
People 65+ Living Below Poverty Level	Female, Black or African American, Hispanic or Latino, Other
Adults with Health Insurance	25-34
Workers who Drive Alone to Work	25-44, 45-54, 55-59, 60-64, Female
Lung and Bronchus Cancer Incidence Rate	Male
Oral Cavity and Pharynx Cancer Incidence Rate	Male

People 25+ with a Bachelor's Degree or Higher	65+, American Indian or Alaska Native, Black or African American, Native Hawaiian or Other Pacific Islander, Other
All Cancer Incidence Rate	Male
People 25+ with a High School Degree or Higher	65+
Colorectal Cancer Incidence Rate	Male
Workers who Walk to Work	25-44, 45-54, 55-59, 60-64, Female, Black or African American
Bladder Cancer Incidence Rate	Male

<sup>\*</sup>See <u>HealthENC.org</u> for indicator values for population subgroups

The list of indicators with significant disparities should be interpreted with caution. Indicators beyond those displayed in Table 19 may also negatively impact a specific subgroup; however, not all data sources provide subpopulation data, so it is not possible to draw conclusions about every indicator used in the secondary data analysis.

## **Geographic Disparities**

Geographic disparities are identified using the SocioNeeds Index®. Zip code 28301, with an index value of 96.8, has the highest socioeconomic need within Cumberland County, potentially indicating poorer health outcomes for its residents. See the <a href="SocioNeeds Index">SocioNeeds Index</a>® for more details, including a map of Cumberland County zip codes and index values.

# **Conclusion**

The Community Health Needs Assessment utilized a comprehensive set of secondary data indicators measuring the health and quality of life needs for Cumberland County. The assessment was further informed with input from Cumberland County residents through a community survey and focus group discussions that included participants from broad interests of the community. The data synthesis process identified nine significant health needs: Access to Health Services, Economy, Exercise, Nutrition & Weight, Immunizations & Infectious Diseases, Occupational & Environmental Health, Other Chronic Diseases, Public Safety, Respiratory Diseases and Substance Abuse. The prioritization process identified five focus areas: (1) Access to Health Services (2) Economy (Social Determinants of Health), (3) Exercise, Nutrition & Weight, (4) Public Safety, and (5) Substance Abuse. Following this process, Cumberland County will outline how it plans to address these health needs in its implementation plan.

We hope to incorporate any feedback on this report into the next CHNA process. Please send your feedback and comments to Trey Wright, Local Public Health Administrator, at (910) 433-3672 or <a href="mailto:twright@co.cumberland.nc.us">twright@co.cumberland.nc.us</a>.

# **Appendix A. Impact Since Prior CHNA**

2016 Priorities	Activities to Address Health Priorities	Implemente d (Yes/No)	Results, Impact & Data Sources
Opioid and Substance Abuse	Provide Information, education, and awareness on overdose prevention kits in Cumberland County.	Yes	Initiated a media campaign to education the public on opioid overdose awareness.
	Increase trust in Law Enforcement and Law Enforcement Assisted Diversion (LEAD).	yes	Provided educational materials to community members and Opioid Response Task for on LEAD program. Health Education Unit worked with local organizations providing direct services distributing over 3,000 brochures to community partners for opioid and overdose.
Chronic Disease Prevention	Reduce tobacco use and Second-hand smoke exposure.	Yes	Quit-Line Referrals made by Clinic Staff, Health Education Unit, and Tobacco Control Prevention Coordinators. Smoking Cessation classes provided by Health Department Staff and Community Members. 2016-2019: seven series of Fresh Start Smoking Cessation program. Five Health Education Division staff members have been trained in Smoking Cessation Program.
	Implement Chronic Disease Self- Management Program (CDSMP)	Yes	Health Education Staff provide CDSMP workshops to local towns/municipalities, community agencies, and general public. Cumberland provided four CDSMP workshops (56) and ten MOB (Matter of Balance) (166) workshops serving 222 participants with 188 completing the program with 84 % completion rate for programs.
	Implement Diabetes Disease Self- Management Program (DSMP)	Yes	Health Education Staff provided four DSMP workshops (42 participants) with 90% completion rate for programs.
Teen	Implement Making Proud	Yes	Health Education Staff provided MPC program to Cumberland County

Pregnancy Prevention	Choices (MPC)		Schools participating Middle and High School Health/Wellness Students.  2016-2017: 529 Students reached,  • MPC- 4 programs with 203 students reached.  • Contraceptive Education- 5 programs with 326 students reached.  2017-2018: 821 reached  • MPC- 2 programs with 84 students reached  • Contraceptive Education- 13 programs with 737 students reached  2018- 2019: 760 reached  • MPC-3 programs with 96 students reached  • Contraceptive Education-5 programs with 288 students reached  • Middle School condom demo-6 programs with 376 students reached
Council	Implement Sexual Health and Adolescent Risk Prevention (SHARP)	Yes	Health Education Staff provided SHARP education workshops to the Cumberland County Detention Center 9 times year.  Through SHARP, 37 participants reached!  SHARP- 1 program with 3 students reached  SHARP-7 programs with 20 students reached  SHARP-5 programs with 14 students reached
Sexual Transmitted Infections	Implement Sister Saving Sisters Program	Yes	Cumberland received this curriculum late Nov. and is preparing for funding support for training and implementation for this curriculum in 2019 and 2020.
	Implement Making Proud	No	Staff received this curriculum late November and is preparing for

Choices for Out Youth.	of Home	funding support for training and implementation for this curriculum in 2019 and 2020.
Implement Mar Many Voices (3)	•	Staffs not trained in this program.
Implement Hea Relationships Pi	•	Staff not trained in this program.
Implement Vide Opportunity for Innovative Cond Education and S (VOICES).	dom	Since 2016, 25 participants were reached (2 sessions) CC Detention Center and this program is being used with this community.

# **Appendix B. Secondary Data Scoring**

#### **Overview**

Data scoring consists of three stages, which are summarized in Figure 50:

#### **Comparison Score**

For each indicator, Cumberland County is assigned up to 7 comparison scores based on its comparison to other communities, whether health targets have been met, and the trend of the indicator value over time. Comparison scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 51).

#### **Indicator Score**

Indicator scores are calculated as a weighted average of comparison scores. Indicator scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 51).

#### **Topic Score**

Indicators are then categorized into topic areas. Topic scores are calculated by averaging all relevant indicator scores, with indicators equally weighted. Topic scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 51). Indicators may be categorized into more than one topic area.

Figure 51. Secondary Data Scoring

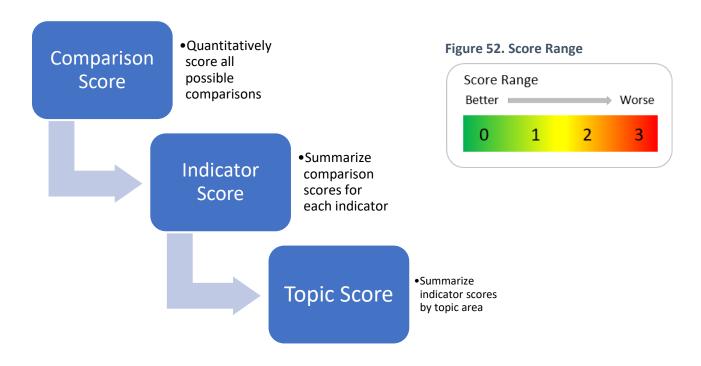

Figure 53. Comparisons used in Secondary

# **Comparison Scores**

Up to 7 comparison scores were used to assess the status of Cumberland County. The possible comparisons are shown in Figure 52 and include a comparison of Cumberland County to North Carolina counties, all U.S. counties, the North Carolina state value, the U.S. value, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over time. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected for other communities, and changes in methodology over time. The determination of comparison scores for each type of comparison is discussed in more detail below.

Figure 54. Compare to Distribution Indicator

# Comparison to a Distribution of North Carolina Counties and U.S. Counties

For ease of interpretation and analysis, indicator data on <u>HealthENC.org</u> is visually represented as a green-yellow-red gauge showing how Cumberland County is faring against a distribution of counties in North Carolina or the U.S. (Figure 53).

A distribution is created by taking all county values within the state or nation,

ordering them from low to high, and dividing them into four equally sized groups based on their order (Figure 50). The comparison score is determined by how Cumberland County falls within these four groups or quartiles.

**Figure 55. Distribution of County Values** 

#### Comparison to North Carolina Value and U.S. Value

As shown in Figure 55, the diamond represents how Cumberland County compares to the North Carolina state value and the national value. When comparing to a single value, the comparison score is determined by how much better or worse the county value is relative to the comparison value.

Figure 56. Comparison to Single Value

Figure 57. Comparison to Target Value

# Comparison to Healthy People 2020 and Healthy North Carolina 2020 Targets

As shown in Figure 56, the circle represents how Cumberland County compares to a target value. Two target values are taken into consideration for

this analysis: Healthy People 2020 and Healthy North Carolina 2020. Healthy People 2020² goals are national objectives for improving the health of the nation set by the Department of Health and Human Services' (DHHS) Healthy People Initiative. Healthy North Carolina 2020³ objectives provide a common set of health indicators that the state can work to improve. The North Carolina Institute of Medicine, in collaboration with the Governor's Task Force for Healthy Carolinians; the Division of Public Health, North Carolina Department of Health and Human Services (NC DHHS); the Office of Healthy Carolinians and Health Education, NC DHHS; and the State Center for Health Statistics, NC DHHS, helped lead the development of the Healthy NC 2020 objectives. When comparing to a target, the comparison score is determined by whether the target is met or unmet, and the percent difference between the indicator value and the target value.

<sup>&</sup>lt;sup>2</sup> For more information on Healthy People 2020, see <a href="https://www.healthypeople.gov/">https://www.healthypeople.gov/</a>

<sup>&</sup>lt;sup>3</sup> For more Information on Healthy North Carolina 2020, see: <a href="https://publichealth.nc.gov/hnc2020/">https://publichealth.nc.gov/hnc2020/</a>

#### **Trend Over Time**

As shown in Figure 53, the square represents the measured trend. The Mann-Kendall statistical test for trend is used to assess whether the value for Cumberland County is increasing or decreasing over time and whether the trend is statistically significant. The trend comparison uses the four most recent comparable values for the county, and statistical significance is determined at the 90% confidence level. For each indicator with values available for four time periods, a comparison score is determined by the trend's direction and its statistical significance.

Figure 58. Trend Over Time

#### **Missing Values**

Indicator scores are calculated using the comparison scores, availability of which depends on the data source. If an indicator does not have data for a specific comparison type that is included for indicator score calculations, the missing comparison is substituted with a neutral score. When information is unknown due to lack of comparable data, the neutral value assumes that the missing comparison score is neither good nor bad and does not impact the indicator's weighted average.

### **Indicator Scoring**

Indicator scores are calculated as a weighted average of all included comparison scores. If none of the included comparison types are possible for an indicator, no score is calculated, and the indicator is excluded from the data scoring results.

## **Topic Scoring**

Indicator scores are averaged by topic area to calculate topic scores. Each indicator may be included in up to three topic areas if appropriate. Resulting scores range from 0-3, where a higher score indicates a greater level of need as evidenced by the data. A topic score is only calculated if it includes at least three indicators.

# Age, Gender and Race/Ethnicity Disparities

When a given indicator has data available for population subgroups – such as age, gender and race/ethnicity – and values for these subgroups include confidence intervals, we are able to determine if there is a significant difference between the subgroup's value and the overall value. A significant difference is defined as two values with non-overlapping confidence intervals. Confidence intervals are not available for all indicators. In these cases, disparities cannot be determined because there is not enough data to conclude whether two values are significantly different from each other.

# **Topic Scoring Table**

Table 20 shows the Topic Scores for Cumberland County, with higher scores indicating a higher need.

**Table 20. Topic Scores for Cumberland County** 

Health and Quality of Life Topics	Score
Immunizations & Infectious Diseases	2.10

Access to Health Services	0.98

## **Indicator Scoring Table**

Table 21 (spanning multiple pages) presents the indicator data used in the quantitative data analysis. Indicators are grouped into topic areas and sorted by indicator score, with higher scores indicating a higher need. Cumberland County values are displayed alongside various comparison values and the period of measurement. Additional data can be found on <a href="HealthENC.org">HealthENC.org</a>.

# **Appendix C. Primary Data**

Primary data used in this assessment was collected through a community survey and focus groups. The survey instruments and focus group questions are provided in this Appendix:

- English Survey
- Spanish Survey
- Focus Group Questions

## Eastern North Carolina Community Health Survey 2018

Welcome to the Community Health Survey for Eastern North Carolina!

We are conducting a Community Health Assessment for your county. This assessment is being undertaken by a partnership of 33 counties, hospitals, health systems, and health departments in Eastern North Carolina. It allows these partners to better understand the health status and needs of the community they serve and use the knowledge gained to implement programs that will benefit the community.

We can better understand community needs by gathering voices from the community. This survey allows community members like you to tell us about what you feel are important issues for your community. We estimate that it will take about 20 minutes to complete this ~60 question survey. Your answers to these questions will be kept confidential and anonymous.

Thank you very much for your input and your time! If you have questions about this survey, please contact Will Broughton at <a href="will.broughton@foundationhli.org">will.broughton@foundationhli.org</a>.

## Part 1: Quality of Life

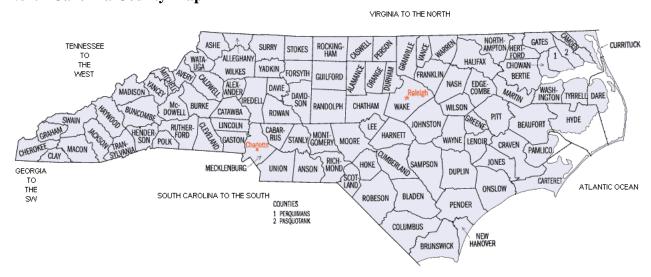

First, tell us a little bit about yourself...

1. Where do you o	currently live?
ZIP/Postal Code	

### 2. What county do you live in?

Beaufort	Franklin	Onslow
Bertie	Gates	Pamlico
Bladen	Greene	Pasquotank
Camden	Halifax	Pender
Carteret	Hertford	Perquimans
Chowan	Hoke	Pitt
Cumberland	Hyde	Sampson
Currituck	Johnston	Tyrrell
Dare	Lenoir	Washington
Duplin	Martin	Wayne
Edgecombe	Nash	Wilson

#### **North Carolina County Map**

3. Think about the county that you live in. Please tell us whether you "strongly disagree", "disagree", "neutral", "agree" or "strongly agree" with each of the next 9 statements.

Statements	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
There is good healthcare in my County.					
This County is a good place to raise children.					
This County is a good place to grow old.					
There is plenty of economic opportunity in this					
This County is a safe place to live.					
There is plenty of help for people during times					
There is affordable housing that meets my					
There are good parks and recreation facilities					
It is easy to buy healthy foods in this County.					

# PART 2: Community Improvement

The next set of questions will ask about community problems, issues, and services that are important to you. Remember your choices will not be linked to you in any way.

	4. Please look at this list of community issues. In your opinion, which <u>one</u> issue most affects the quality of life in this County? ( <i>Please choose only one</i> .)							
	Pollution (air,		Discrimination/		Domestic violence			
water	, land)	racism	า		Violent crime			
	Dropping out of		Lack of community	(murd	er, assault)			
schoo	ol	suppo	ort		Theft			
	Low		Drugs (Substance		Rape/sexual			
incom	ne/poverty	Abuse	Abuse)		t			
	Homelessness		Neglect and abuse					
	Lack		Elder abuse					
of/ina	dequate health		Child abuse					
insura	nnce							
	Hopelessness							
	Other (please specify)							

	your opinion, which <u>one</u> o borhood or community? (		llowing services needs the choose only one.)	most in	nprovement in your	
	Animal control		Number of health		Positive teen	
	Child care options	care p	providers	activit	ies	
	Elder care options		Culturally		Transportation	
	Services for	appro	priate health	option	ns Availability	
disab	led people	servic	res	of em	ployment	
	More affordable		Counseling/		Higher paying	
health	n services	ment	al health/ support	employment		
	Better/ more	group	os		Road maintenance	
healt	ny food choices		Better/ more		Road safety	
	More	recrea	ational facilities		None	
afford	dable/better housing	(parks, trails, community				
		cente	rs)			
			Healthy family			
		activi	ties			
	Other (please specify)					

# PART 3: Health Information

Now we'd like to hear more about where you get health information...

	your opinion, which <u>one</u> h mation about? ( <i>Please sug</i>		ehavior do people in your ly one.)	own co	mmunity need more
	Eating well/		Using child safety		Substance abuse
nutrit	ion	car se	eats	preve	ntion (ex: drugs and
	Exercising/ fitness		Using seat belts	alcoh	ol)
	Managing weight		Driving safely		Suicide prevention
	Going to a dentist		Quitting smoking/		Stress
for ch	neck-ups/ preventive	tobac	co use prevention	mana	gement
care			Child care/		Anger
	Going to the	parer	nting	mana	gement
docto	or for yearly check-		Elder care		Domestic violence
ups a	nd screenings		Caring for family	preve	ntion
	Getting prenatal	mem	bers with special		Crime prevention
care o	during pregnancy	needs	s/ disabilities		Rape/ sexual
	Getting flu shots		Preventing	abuse	prevention
and c	other vaccines	pregr	nancy and sexually		None
	Preparing for an	transı	mitted disease (safe		
emer	gency/disaster	sex)			
	Other (please specify)				

7. Wh	7. Where do you get most of your health-related information? (Please choose only one.)							
	Friends and family		Internet		Employer			
	Doctor/nurse		My child's school		Help lines			
	Pharmacist		Hospital		Books/magazines			
	Church		Health department					
	Other (please specify)							

8. Wł	nat health topic(s)/ disease	e(s) wou	ld you like to learn mor	e about?	
	you provide care for an eose only one.)	elderly r	elative at your residence	e or at and	other residence?
	Yes

#### Encuesta de salud de la comunidad del Este de Carolina del Norte 2018

¡Bienvenido a la encuesta de salud comunitaria para el Este de Carolina del Norte!

Estamos llevando a cabo una evaluación de salud comunitaria para su condado. Esta evaluación está siendo realizada por una asociación de 33 condados, hospitales, sistemas de salud y departamentos de salud en el Este de Carolina del Norte. Esta evaluación les permite a estos socios comprender mejor el estado de salud y las necesidades de la comunidad a la que sirven y utilizar el conocimiento adquirido para implementar programas que beneficiarán a esta comunidad.

Podemos entender mejor las necesidades de la comunidad reuniendo las voces de los miembros de su comunidad. Esta evaluación permite que los miembros de la comunidad como usted, nos cuente sobre lo que considera son asuntos importantes para su comunidad. De ante mano le agradecemos por los 20 minutos que tomará completar esta encuesta de 57 preguntas. Sus respuestas a estas preguntas se mantendrán confidenciales y anónimas.

¡Muchas gracias por su aporte y su tiempo! Si tiene preguntas sobre esta encuesta, puede enviar un correo electrónico a Will Broughton en <u>will.broughton@foundationhli.org.</u>

### PARTE 1: Calidad de vida

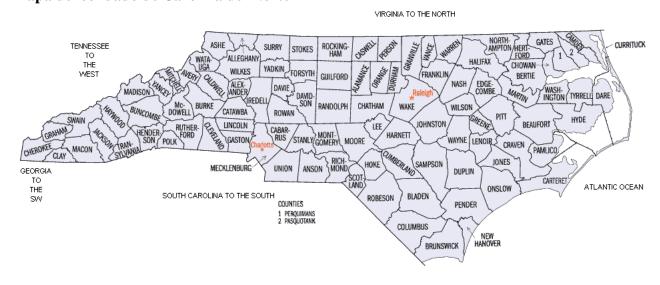

Primero, cuéntanos un poco sobre usted:

3. ¿Dónde vive a	¿Dónde vive actualmente?					
Código postal						

## 4. ¿En qué condado vive?

### **Focus Group Questions**

Participants' Resident County(ies):
Focus Group Name / Number:
Date Conducted:
Location:
Start Time:
End Time:
Number of Participants:
Population Type (if applicable):
Moderator Name:
Moderator Email:
Note Taker Name:
Note Taker Email:
Core Questions
1. Introduce yourself and tell us what you think is the best thing about living in this community.
2. What do people in this community do to stay healthy?  Prompt: What do you do to stay healthy?
3. In your opinion, what are the serious health related problems in your community? What are some of the causes of these problems?
4. What keeps people in your community from being healthy?  Prompt: What challenges do you face that keep you from being healthy? What barriers exist to being healthy?
5. What could be done to solve these problems?  Prompt: What could be done to make your community healthier? Additional services or changes to existing services?

6. Is there any group not receiving enough health care? If so, what group? And why?
7. Is there anything else you would like us to know?
Additional Questions
1. How do people in this community get information about health? How do you get information about health?
2. Have you or someone close to you ever experienced any challenges in trying to get healthcare services? If so, what happened?
3. What is the major environmental issue in the county?
4. Describe collaborative efforts in the community. How can we improve our level of collaboration?
5. What are the strengths related to health in your community?  Prompt: Specific strengths related to healthcare?  Prompt: Specific strengths to a healthy lifestyle?
6. If you had \$100,000 to spend on a healthcare project in the county, how would you spend it?
